## **An Algebraic Approach To Non Classical Logics:**

*An Algebraic Approach to Non-classical Logics* Helena Rasiowa,1974 The main aim of this book is to formulate an algebraic approach to a carefully selected widest possible class of logics and to prove fundamental theorems for it which previously have usually been proved for each of those logics separately The second aim of this book has been to give a number of examples of logics which belong to the class above

**V.A. Yankov on Non-Classical Logics, History and Philosophy of Mathematics** Alex Citkin,Ioannis M. Vandoulakis,2022-11-08 This book is dedicated to V A Yankov s seminal contributions to the theory of propositional logics His papers published in the 1960s are highly cited even today The Yankov characteristic formulas have become a very useful tool in propositional modal and algebraic logic The papers contributed to this book provide the new results on different generalizations and applications of characteristic formulas in propositional modal and algebraic logics In particular an exposition of Yankov s results and their applications in algebraic logic the theory of admissible rules and refutation systems is included in the book In addition the reader can find the studies on splitting and join splitting in intermediate propositional logics that are based on Yankov type formulas which are closely related to canonical formulas and the study of properties of predicate extensions of non classical propositional logics The book also contains an exposition of Yankov s revolutionary approach to constructive proof theory The editors also include Yankov s contributions to history and philosophy of mathematics and foundations of mathematics as well as an examination of his original interpretation of history of Greek philosophy and mathematics

*Automated Theorem-proving in Non-classical Logics* Paul B. Thistlewaite,Michael A. McRobbie,Robert K. Meyer,1988

**Nonclassical Logics and Information Processing** David A. Pearce,Wansing H. (Heinrich),1992 This volume comprises the proceedings of the First All Berlin Workshop on Nonclassical Logics and Information Processing held at the Free University of Berlin November 9 10 1990 The scope of the ten papers in the volume is broad covering various different subfields of logic particularly nonclassical logic and its applications in artificial intelligence The papers are grouped according to the four major topics that emerged at the meeting modal systems logic programming nonmonotonic logics and proof theory The classification is only a rough guide since the four areas overlap considerably

*Interval / Probabilistic Uncertainty and Non-classical Logics* Van-Nam Huynh,Yoshiteru Nakamori,Hiroakira Ono,Jonathan Lawry,Vladik Kreinovich,Hung T. Nguyen,2008-01-11 This book contains the proceedings of the first International Workshop on Interval Probabilistic Uncertainty and Non Classical Logics Ishikawa Japan March 25 28 2008 The workshop brought together researchers working on interval and probabilistic uncertainty and on non classical logics It is hoped this workshop will lead to a boost in the much needed collaboration between the uncertainty analysis and non classical logic communities and thus to better processing of uncertainty

Logic and Implication Petr Cintula,Carles Noguera,2022-01-01 This monograph presents a general theory of

weakly implicative logics a family covering a vast number of non classical logics studied in the literature concentrating mainly on the abstract study of the relationship between logics and their algebraic semantics It can also serve as an introduction to abstract algebraic logic both propositional and first order with special attention paid to the role of implication lattice and residuated connectives and generalized disjunctions Based on their recent work the authors develop a powerful uniform framework for the study of non classical logics In a self contained and didactic style starting from very elementary notions they build a general theory with a substantial number of abstract results The theory is then applied to obtain numerous results for prominent families of logics and their algebraic counterparts in particular for superintuitionistic modal substructural fuzzy and relevant logics The book may be of interest to a wide audience especially students and scholars in the fields of mathematics philosophy computer science or related areas looking for an introduction to a general theory of non classical logics and their algebraic semantics **Journal of Applied Non-classical Logics** ,2008 **The Journal of**

Studies in Algebraic Logic Aubert Daigneault,1974 As will be seen in the four papers brought under this cover algebraic logic did not stop with the invention of polyadic and cylindric algebras and the development of their theory These papers which were all written especially for this study present rather different facets of contemporary concepts and results in the subject **A Treatise on Many-valued Logics** Siegfried Gottwald,2001 A growing interest in many valued logic has developed which to a large extent is based on applications intended as well as already realised ones These applications range from the field of computer science e g in the areas of automated theorem proving approximate reasoning multi agent systems switching theory and program verification through the field of pure mathematics e g in independence of consistency proofs in generalized set theories or in the theory of particular algebraic structures into the fields of humanities linguistics and philosophy Bulletin of the American Mathematical Society American Mathematical Society,1977 *Scientiae*

*Mathematicae Japonicae* ,2001 **Contributions to General Algebra 16** Ivan Chajda,2005 **Orthomodular Lattices**

Gudrun Kalmbach,1983 This book has evolved from a set of lecture notes of a course on orthomodular lattices given at the University of Ulm Most concepts are developed from their very first notions but in some instances basic set theory and Hilbert space theory may be needed The text is in general independent of the exercises and supplementary remarks The book can be used for a general lecture on orthomodular lattices and also for seminars on special geometrical or logical topics As the first monograph in the field it makes the widely spread results on orthomodular lattices more easily accessible for researchers **Annales Societatis Mathematicae Polonae** Polskie Towarzystwo Matematyczne,1984 Definitions
