## **An Anatomy Of Trade In Medieval Writing Value Consent And Community:**

*An Anatomy of Trade in Medieval Writing* Lianna Farber, 2018-07-05 Economics in our modern sense of the term was not a discipline in the Middle Ages although the history of economic thought is often written as though it were Lianna Farber restores the core economic concept of trade to its medieval contexts showing that it contains three component parts value consent and community Medieval writing about trade not only relies on these elements it presents them as unproblematic By addressing texts in which each element of trade is discussed directly Farber demonstrates that this straightforward picture is falsely reassuring In fact these ideas were deeply contested In the end Farber reveals writing about trade was not descriptive but argumentative analyzing the act in an attempt to justify it Such texts reveal deep intellectual uncertainties about the market society they advocated *An Anatomy of Trade in Medieval Writing* benefits from Farber's close reading of literary sources among them the poetry of Geoffrey Chaucer and Robert Henryson theological sources including the writing of Thomas Aquinas and Richard of Middleton and legal sources such as the canon law on marriage formation A provocative contribution to our understanding of medieval life and thought this book implies a need to reconsider the genealogy of economics as a way of thinking about the world

*Chaucer, Gower, Hoccleve and the Commercial Practices of Late Fourteenth-Century London* Craig E. Bertolet, 2016-04-15 As residents of fourteenth century London Geoffrey Chaucer John Gower and Thomas Hoccleve each day encountered aspects of commerce such as buying selling and worrying about being cheated Many of Chaucer's *Canterbury Tales* address how pervasive the market had become in personal relationships Gower's writings include praises of the concept of trade and worries that widespread fraud has harmed it Hoccleve's poetry examines the difficulty of living in London on a slender salary while at the same time being subject to all the temptations a rich market can provide Each writer

finds that principal tensions in London focused on commerce how it worked who controlled it how it was organized and who was excluded from it Reading literary texts through the lens of archival documents and the sociological theories of Pierre Bourdieu this book demonstrates how the practices of buying and selling in medieval London shaped the writings of Chaucer Gower and Hoccleve Craig Bertolet constructs a framework that reads specific Canterbury tales and pilgrims associated with trade alongside Gower s *Mirour de L Omme* and *Confessio Amantis* and Hoccleve s *Male Regle* and *Regiment of Princes* Together these texts demonstrate how the inherent instability commerce produces also produces narratives about that commerce

Living the Middle Life, Secular Priests and Their Communities in Thirteenth-century Genoa John Benjamin Yousey-Hindes,2010 Secular priests occupied a central place within thirteenth century European society carrying out important duties within the institutional Church as well as participating in the lay and religious communities around them This dissertation uses secular sources the private registers of public notaries to show that priests in the port city of Genoa entered into economic spiritual and social transactions with a wide range of people In doing so they built complex and durable relationships that provided ample opportunities for the exchange of ideas and values with the women men and other clerics with whom they shared their lives If a major trend in scholarship on the Middle Ages over the past seventy years has been to emphasize the religiosity of lay people s everyday world then this dissertation looks the other direction to explore the so called secularity of religious institutions and their priests Ultimately the notarial registers prove that Genoa s priests were not mere facilitators of lay religiosity or agents of ecclesiastical power rather they played a multivalent role in the intermediary space between lay and religious communities Chapter One provides an overview of Genoa s ecclesiastical structure and demonstrates how private notarial registers can provide useful perspectives on secular priests lives Chapter Two investigates how priests participation in the real estate and credit markets helped weave them into the fabric of Genoese neighborhoods Chapter Three uses the notarial registers to show priests carrying out their core professional duties tending to the health of souls in their communities Chapter Four demonstrates priests important intermediary position by examining their service as executors agents arbiters and judges Chapter Five explores how secular priests embodied the Genoese Church overseas in Genoa s network of trading settlements around the Mediterranean and Black Seas Finally the Conclusion considers the broader contours of priests social networks identifying trends that cut across the heuristic boundaries that structure earlier chapters It also summarizes the value of the private registers as sources for ecclesiastical and clerical history

The Moral Background Gabriel Abend,2014-03-23 In recent years many disciplines have become interested in the scientific study of morality However a conceptual framework for this work is still lacking In *The Moral Background* Gabriel Abend develops just such a framework and uses it to investigate the history of business ethics in the United States from the 1850s to the 1930s According to Abend morality consists of three levels moral and immoral behavior or the behavioral level moral understandings and norms or the normative level and the moral background which includes what moral concepts exist

in a society what moral methods can be used what reasons can be given and what objects can be morally evaluated at all This background underlies the behavioral and normative levels it supports facilitates and enables them Through this perspective Abend historically examines the work of numerous business ethicists and organizations such as Protestant ministers business associations and business schools and identifies two types of moral background Standards of Practice is characterized by its scientific worldview moral relativism and emphasis on individuals actions and decisions The Christian Merchant type is characterized by its Christian worldview moral objectivism and conception of a person s life as a unity The Moral Background offers both an original account of the history of business ethics and a novel framework for understanding and investigating morality in general

*Historians on John Gower* Stephen Henry Rigby, Siân Echard, 2019 John Gower s poetry offers an important and immediate response to the turbulent events of his day The essays here examine his life and his works from an historical angle bringing out fresh new insights The late fourteenth century was the age of the Black Death the Peasants Revolt the Hundred Years War the deposition of Richard II the papal schism and the emergence of the heretical doctrines of John Wyclif and the Lollards These social political and religious crises and conflicts were addressed not only by preachers and by those involved in public affairs but also by poets including Chaucer and Langland Above all though it is in the verse of John Gower that we find the most direct engagement with contemporary events Yet surprisingly few historians have examined Gower s responses to these events or have studied the broader moral and philosophical outlook which he used to make sense of them Here a number of eminent medievalists seek to demonstrate what historians can add to our understanding of Gower s poetry and his ideas about society the nobility and chivalry the peasants and the 1381 revolt urban life and the law the Church the clergy papacy Lollardy monasticism and the friars gender masculinity and women and power politics political theory and the deposition of Richard II and science and astronomy The book also offers an important reassessment of Gower s biography based on newly discovered primary sources

Constructing a Civic Community in Late Medieval London David Harry, 2019 An examination of the growth of civic power in the turbulent arena of late medieval London In the late fourteenth century London s government through mismanagement and negligence experienced a series of crises Relationships with the crown were tested competing factions sought to wrest power from the

hands of the once all powerful victualling guilds revolt in the streets in 1381 targeted the institutions of royal as well as civic power and between 1392 and 1397 King Richard removed the liberties of the city and appointed his own wardensto govern in place of the mayor of London This book examines the strategies employed by the generation of London aldermen who governed after 1397 to regain control of their city By examining a range of interdisciplinary sources including manuscript and printed books administrative records accounts of civic ritual and epitaphs the author shows how by carefully constructing the idea of a civic community united by shared political concerns and spiritual ambitions a small number of men virtually monopolised power in the capital More generally this is an exploration of the mentalities of those who sought civic power in the late Middle Ages and provokes the question whygovern and for whom DAVID HARRY is Lecturer in History at the University of Chester Encomia Bulletin Bibliographique de la Société Internationale de Littérature Courtoise Logan E.
