An Apartments No Place For A Kid:

There's No Place Like Home Anna Lou Dehavenon,1999-01-30 This collection of essays addresses the lack of shelter one of the most basic elements of human adaptation now experienced by many Americans Based on the presupposition that shelter is a basic human right in the world s richest most advanced nation the authors of these essays look more closely than others have yet done at the causes of the current low income housing crisis and homelessness Ten anthropologists and a mental health worker use participant observation and other ethnographic methods to observe and document the experiential and geographic diversity of U S homelessness Each chapter focuses on a specific geographic area urban suburban or rural and a specific category of homeless people families with children solitary adults or both Based on their findings the authors also present policy recommendations to ameliorate the housing shortage and prevent homelessness at local state and federal levels

War Labor Policies Board,1919 *The Children of Perestroika* Deborah Adelman,2015-04-08 This work provides an examination of US refugee policy since the 1960s particularly as it has been applied to Cuba Haiti and Central America The authors also address world wide refugee problems proposing ideas for the 21st century

Barren States Carrie B. Douglass,2020-05-25 The fertility rate has dramatically declined across Europe in recent years Globally over sixty four countries have fallen below generation replacement levels and countries in eastern and southern Europe are registering the lowest birth rates in the history of humanity Demographers emphasize that these developments could have serious repercussions for society and public policy from a projected drastic loss of national population numbers to labor shortages and a swelling population of over 65s Typically analysts have approached the issue of low fertility quantitatively and from state levels As a result most research tends to elide any nuanced understanding of this significant trend Filling a major gap this timely book goes well beyond existing studies to investigate how people experience understand and speak about what is called low fertility On the individual level is there such a thing How do people understand their choices and the perceived limitations on their lives What is the meaning of motherhood for women today How has the definition of family changed What are the particularities of fertility decline in each country And perhaps most importantly what does this tendency toward fewer births mean to the women and men who ultimately become demographic statistics Offering new readings and a much deeper understanding of Europe s decline in fertility this exciting book adds the voices of everyday people to previous state centered studies Overturning a number of assumptions case studies show that having fewer children is often understood positively in Europe as a means to freedom and self empowerment Anyone wishing to understand what low fertility means to the people who live it will find this book essential reading
