Cosmic Magnetism:

Cosmic Magnetism, Percy Seymour, 1986 The study of extraterrestrial magnetic fields is a relatively new one confirmation of the existence of the first such field that of our Sun having come as late as 1908 In the past 30 years a great amount of knowledge has been accumulated on Cosmic Magnetism which has turned out to be a truly fascinating topic for study Percy Seymour's book is the first to deal with the topic in a non mathematical way and he offers a fine introduction to his subject The first three chapters consolidate our knowledge on magnetism in general and the magnetic field of the Earth as well as discussing the reasons for studying astronomy and cosmic magnetism in particular The remainder of the book is devoted to the main areas of cosmic magnetism solar planetary and interplanetary fields fields in stars and pulsars fields of the milky way and fields in other galaxies Cosmic Magnetism in an ideal book for sixth formers and undergraduates studying physics or astronomy and will also appeal to amateur astronomers as previous work on this topic has been hidden in specialised academic journals

Questions of Modern Cosmology Mauro D'Onofrio, Carlo Burigana, 2009-07-09 Are we living in the golden age of cosmology Are we close to understanding the nature of the unknown ingredients of the currently most accepted cosmological model and the physics of the early Universe Or are we instead approaching a paradigm shift What is dark matter and does it exist How is it distributed around galaxies and clusters Is the scientific community open to alternative ideas that may prompt a new scientific revolution as the Copernican revolution did in Galileo's time Do other types of supernovae exist that can be of interest for cosmology Why have quasars never been effectively used as standard candles Can you tell us about the scientific adventure of COBE How does the extraction of the Cosmic Microwave Background anisotropy depend on the subtraction of the various astrophysical foregrounds These among many others are the astrophysical philosophical and sociological questions surrounding modern cosmology and the scientific community that Mauro D Onofrio and Carlo Burigana pose to some of the most prominent cosmologists of our time Triggered by these questions and in the spirit of Galileo's book Dialogue Concerning the Two Chief World Systems the roughly 40 interview partners reply in the form of essays with a critical frankness not normally found in reviews monographs or textbooks

The Square Kilometre Array SKA will provide more than one order of magnitude improvement in sensitivity compared with any existing radio telescope over a wavelength range of several hundred to one from decametric to microwave wavelengths It will revolutionize the study of the most abundant element in the Universe hydrogen from the epoch of reionisation to the present day probing the onset formation period of the very first stars will closely scan proto planets and through the precision timing of pulsars will detect the distortions of space time due to gravitational radiation The SKA is a sensing network spanning 3000 km from its centre and with a collecting area of more than 1 square kilometre using technologies of the 21st century The SKA will make the study of a wide range of phenomena initially studied at other wavelengths possible at radio wavelengths as well as opening a new discovery window on new phenomena at radio wavelengths Symposium 7 of the JENAM 2010 aimed at bringing these diverse opportunities to the attention of both theoretical and observational astronomers working at all wavelengths including the potential for synergies with other facilities The meeting highlighted the scientific potential of the SKA discussed scientific priorities and their impact on the design of the SKA explored the synergies between the SKA and other next generation astronomical facilities in different wavelength domains such as the ALMA ELTs LSST JWST GRE IXO Gaia and Euclid and high energy facilities Auger explored the cyber infrastructure that may become available for the distribution and distributed analysis of SKA data
