**Natural Signs and Knowledge of God** C. Stephen Evans, 2010-05-27 Is there such a thing as natural knowledge of God C Stephen Evans presents the case for understanding theistic arguments as expressions of natural signs in order to gain a new perspective both on their strengths and weaknesses Three classical much discussed theistic arguments cosmological teleological and moral are examined for the natural signs they embody At the heart of this book lie several relatively simple ideas One is that if there is a God of the kind accepted by Christians Jews and Muslims then it is likely that a natural knowledge of God is possible Another is that this knowledge will have two characteristics it will be both widely available to humans and yet easy to resist If these principles are right a new perspective on many of the classical arguments for God s existence becomes possible We understand why these arguments have for many people a continued appeal but also why they do not constitute conclusive proofs that settle the debate once and for all Touching on the interplay between these ideas and contemporary scientific theories about the origins of religious belief particularly the role of natural selection in predisposing humans to form beliefs in God or gods Evans concludes that these scientific accounts of religious belief are fully consistent even supportive of the truth of religious convictions NASA Technical Translation ,1971 *Art and AsiaPacific* ,2006
