Cosmic Poetics Thomas Lowe Taylor,1991      *Cosmic Connections* Charles Taylor,2024-05-21 Charles Taylor delves into the poetry of the Romantics and their heirs a foundation of his distinctive philosophy of language Taylor holds that Romantic poetry responded to disenchantment with old cosmic orders depleted artists groped to articulate new meanings by bringing connections to life rather than merely reasoning abstractly about life      **Transcultural Poetics** Gurbhagat Singh,1988

**Fragility and Transcendence** Jeffrey Bloechl,2023-10-04 The thought of Jean Louis Chr tien is most familiar to those who have taken up the theological turn in French phenomenology yet it defies reduction to either phenomenology or theology or for that matter spirituality literature or Greek thought Written in beautiful French prose and argued with unsurpassed erudition Chr tien s works defy easy interpretation One nonetheless finds a center of gravity in attempts to define and then elaborate an original account of human being in terms of call and response from which there follow penetrating studies of language and body as well as illuminating approaches to a range of themes including temporality prayer and religious reading This volume gathers original work from leading scholars in the fields of philosophy theology and poetics including Chr tien s collaborators successors and Anglophone interpreters They engage his work along its main lines at once presenting it in summary fashion and exploring its strengths and weaknesses for our understanding of some of the topics and problems that held his prolonged attention Readers new to Chr tien will easily find a number of points of access while more advanced readers will find that their understanding is both deepened and enriched Contributors Rudolf Bernet Jeffrey Bloechl Emmanuel Falque J r me de Gramont Crina Gshwandtner Emmanuel Housset Stephen E Lewis Jean Luc Marion Catherine Pickstock Andrew Prevot      **Cosmos and the Sacred in the Poetics of Octavio Paz and Saint-John Perse**

Edith Jonsson-Devillers,1976      *The Cosmos and the Creative Imagination* Anna-Teresa Tymieniecka,Patricia Trutty-Coohill,2016-02-03 The essays in this book respond to Anna Teresa Tymieniecka s recent call to explore the relationship between the evolution of the universe and the process of self individuation in the ontopoietic unfolding of life The essays approach the sensory manifold in a number of ways They show that theories of modern science become a strategy for the phenomenological study of works of art and vice versa Works of phenomenology and of the arts examine how individual spontaneity connects with the design s of the logos of the whole and of the particulars while the design s rest not on some human concept but on life itself Life s pliable matrices allow us to consider the expansiveness of contemporary science and to help create a contemporary phenomenological sense of cosmos      **The Poetics of Dreaming** Andrew John Matt,2006

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
