Career Guidance and Counseling Through the Life Span Edwin L. Herr, Stanley H. Cramer, 1988 **International Handbook of Career Guidance** James A. Athanasou, R. van Esbroeck, 2008-08-02

The International Handbook of Career Guidance represents a project of international professional cooperation. It is intended as a catalyst for reform and was designed to support the development of career guidance in the years to come. Working for over four years from Belgium and Australia, we had the privilege to collaborate with over 50 colleagues throughout the world to produce this Handbook. In every instance we selected key researchers who have an established reputation in the field of career development. They agreed to be involved, and we are grateful for their support in this major effort. In this handbook, we have tried to bring together a collection that summarises the diverse aspects of career guidance. It is a synthesis of the domain of career and vocational guidance, firstly for an international readership, and secondly, it is designed to act as a reference for academics, researchers, and professionals in the expanding field of career development. For this reason, the Handbook includes coverage of the background and history of guidance, right through to poignant issues relating to careers in the modern world of work. Policy issues relating to the provision of careers services, as well as professional issues relating to career education, career counselling, career assessment,

program evaluation and research methodologies are covered
