Eddy Street defines successful family counselling as a combination of a number of elements. He argues that it should be in keeping with a family's strengths and style, offer empathic listening to each family member, maintain a perspective of the changing nature of family life, focus on clear and open communication and deal in a problem-solving manner with the task in hand. He takes the reader step by step through these elements, outlining the necessary skills and provides a clear understanding of the processes families have to go through in order to deal with the tasks that are set for them. *Counselling People with Communication Problems* Peggy Dalton, 1994 This step-by-step guide is for those working with people who experience disorders of speech, language, voice and fluency. The author evaluates the forms of counselling that are currently practised alongside direct treatment of the disorders themselves and argues for greater training opportunities and a wider provision of counselling in this field. Peggy Dalton also explores the effects of communication problems on the person's sense of self, relationships and perceptions of the world. She stresses the need for a greater understanding of the experiences of people whose lives may be severely limited by their communication problems and shows how important it is to find ways of discovering the personal meaning of experience. **Doing Family Therapy** Robert Taibbi, 2022-01-23 Engaging, practical and infused with clinical wisdom, this widely used text and practitioner guide helps therapists working with families to hit the ground running. The revised and updated fourth edition brings fresh insights into the issues families bring to therapy and the therapist's moment-to-moment decision-making. Rather than advocating one best approach, Robert Taibbi shows that there are multiple ways to guide parents, children and adolescents and harness their strengths. The beginning, middle and end stages of treatment are richly illustrated with chapter-length case examples. End-of-chapter learning exercises help readers build key skills and creatively develop their own clinical style. New to This Edition: All chapters revised with new case studies throughout. Sidebars on common challenges facing new clinicians, self-doubt, the emotional experience of working with distressed families and more. Increased attention to what the therapist can say and do to actively shape each session. Heightened focus on process, helping families explore the how of
