Discourse Connectives in English Richard George Warner,1981 *Some Emergent Discourse Connectives in English* Diana M. Lewis,2000 Explaining the Development of English Discourse Connectives Roman Darms,Andreas H. Jucker (Anglist),2012 **Marking Discourse Coherence** Uta Lenk,1998 **Pragmatic Markers in English** Laurel J. Brinton,2010-12-14 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics *Discourse Structuring Markers in English* Elizabeth Closs Traugott,2022-03-15 This book is a contribution to the growing field of diachronic construction grammar Focus is on corpus evidence for the importance of including conventionalized pragmatics within construction grammar and suggestions for how to do so The empirical domain is the development of Discourse Structuring Markers in English such as after all also all the same by the way further and moreover also known as Discourse Markers The term Discourse Structuring Markers highlights their use not only to connect discourse segments but also to shape discourse coherence and understanding Monofunctional Discourse Structuring Markers like further instead moreover are distinguished from multifunctional ones like after all and by the way Drawing on usage based work on constructionalization and constructional changes the book is in three parts foundational concepts case studies and currently open issues in diachronic construction grammar These open issues are how to incorporate the concepts subjectification and intersubjectification into a constructional account of change whether position in a clause is a construction and the nature of constructional networks and how they change **Computational Linguistics and Intelligent Text Processing** Alexander Gelbukh,2013-03-12 This two volume set consisting of LNCS 7816 and LNCS 7817 constitutes the thoroughly refereed proceedings of the 13th International Conference on Computer Linguistics and Intelligent Processing CICLING 2013 held on Samos Greece in March 2013 The total of 91 contributions presented was carefully reviewed and selected for inclusion in the proceedings The papers are organized in topical sections named general techniques lexical resources morphology and tokenization syntax and named entity recognition word sense disambiguation and coreference resolution semantics and discourse sentiment polarity subjectivity and opinion machine translation and multilingualism text mining information extraction and information retrieval text summarization stylometry and text simplification and applications **New Trends in Grammaticalization and Language Change** Sylvie Hancil,Tine Breban,José Vicente Lozano,2018-12-06 The chapters in this volume present a state of the art of grammaticalization research in the 2010s They are concerned with the application of new models such as constructionalization the ongoing debate about the status and modelling of the development of discourse markers and reveal a renewed interest in the typological

application of grammaticalization and in the cognitive motivations for unidirectionality The contributors consider data from a wide range of languages including several that have not or marginally been looked at in terms of grammaticalization Chinese Dutch varieties of English French German Japanese Maltese Old Saxon Spanish and languages of the South Caucasian and Zhuang Tai Kadai families The chapters range from theoretical discussions to fine grained analyses of new historical and comparative language data This volume will be of interest to linguists studying morphosyntactic changes in a range of languages and in particular to those interested in models for grammatical change

Connectives as Discourse Landmarks Agnès Celle, Ruth Huart, 2007-06-27 This set of eleven articles by linguists from four different European countries and a variety of theoretical backgrounds takes a new look at the discourse functions of a number of English connectives from simple coordinators and but to phrases of varying complexity after all the fact is that Using authentic spoken and written data from varied sources the authors explore the ways in which current uses of connectives result from the interaction of syntax semantics and prosody both over time and through diversity of discourse situations Most adopt an integrative approach in which speaker listener or writer reader relationships are viewed as part and parcel of the linguistic properties of each marker Because it combines functional generative and enunciative approaches into a coherent whole with a common explanatory aim this book will be of interest to linguists corpus linguists and all those who investigate the semantics pragmatics interface

Concise Encyclopedia of Pragmatics J.L. Mey, 2009-08-07 Concise Encyclopedia of Pragmatics Second Edition COPE is an authoritative single volume reference resource comprehensively describing the discipline of pragmatics an important branch of natural language study dealing with the study of language in its entire user related theoretical and practical complexity As a derivative volume from Encyclopedia of Language and Linguistics Second Edition it comprises contributions from the foremost scholars of semantics in their various specializations and draws on 20 years of

development in the parent work in a compact and affordable format Principally intended for tertiary level inquiry and research this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages As pragmatics is a centrally important and inherently cross cutting area within linguistics it will therefore be relevant not just for meaning specialists but for most linguistic audiences Edited by Jacob Mey a leading pragmatics specialist and authored by experts The latest trends in the field authoritatively reviewed and interpreted in context of related disciplines Drawn from the richest most authoritative comprehensive and internationally acclaimed reference resource in the linguistics area Compact and affordable single volume reference format Connectives of English Speech James Champlin Fernald,1904 A Comparative Study of Discourse Connectives in Written English Guanxin Ren,1988 **Journal of Applied Linguistics: Selected Papers** Hussain Al-Fattah Ahmad,2015-12-10 Selected papers from the Journal of Applied Linguistics Dubai edited by Hussain Al Fattah Ahmad *Language, Corpora, and Technology in Applied Linguistics* Muhammad Afzaal,Swaleha Bano Naqvi,Geng Qiang,2023-11-27 As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus allowing us to have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so realistic in today s market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms Machine translation assisted

communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation Thus understood it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres Papers addressing the highlighted topics are especially welcome In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world

New Perspectives on (Im)Politeness and Interpersonal Communication Lucis Fernández Amaya, Maria de la O Hernández López, Reyes Gómez Morón, 2012-12-18
New Perspectives on Im Politeness and Interpersonal Communication gathers eleven studies by prominent scholars which explore issues related to im politeness in human communication The study of linguistic im politeness is undoubtedly one of the central concerns in the field of pragmatics as attested to by the numerous conferences and journals currently dedicated to the topic the various theoretical models and approaches developed or developing so far and the seemingly endless list of insightful and inspiring empirical studies tackling the topic from a wide variety of angles This volume contributes to the subfield of social pragmatics by putting together works that review the state of the art of im politeness studies analysing im politeness in media contexts like the Internet or dubbed films and other contexts looking into the effects and consequences of some speech acts for social interaction drawing implications for language teaching and approaching some of the linguistic mechanisms which help to communicate im politeness Resulting from the efforts made by specialists in the field the chapters in this volume offer additional evidence that examining the complexity of interpersonal communication from different standpoints can benefit a more complete understanding of social interaction in general Their scope and practical applications demonstrate the transversality and versatility of interpersonal communication The editors hope that these works will retain scholars interest and attention for some time to come and spark off further research
