The theoretical foundations of this book are deeply rooted in culture mannerism language both official and idiomatic and pragmatics of language use The first section sets the theoretical foundation with a thorough overview of critical discourse analysis and the application of this theory in analyzing speech text and emotions The subsequent four sections conduct investigations into a wide array of genres namely academic contexts politics media literature and music respectively and describe the relevant corpora with their specific components from the viewpoints of terminology and lexicography The sixth section looks at discourse and translation offering an in depth excavation of discourse analytical frameworks applicable to translation studies The seventh demarcates discourse and educational settings unpacking what discourse analysis can do to inform teachers and students The section on identity and globalization explores these concepts as defined by linguistic approaches The second last section on discourse markers tackles language meaning and context and employs discourse marker as an umbrella term for linguistic devices that signal communicative intention categorizing them and their functions in Persian conversational and language learning contexts The final part of the work looks at discourse and its interface with pragmatics grammar and or intonation defining grammatical and intonational constructions as a form meaning pair so as to illustrate how they can be utilized to signal different functions Relevant to cultural and theoretical linguistics and specialists in Persian language studies specifically this one stop text is a sweeping compendium to Persian discourse studies

variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk The book stresses that both discourse and its mental processing have a social basis and can only be fully understood in relation to social interaction
