Discourses In Place Language In The Material World:

Discourses in Place Ron Scollon, Suzie Wong Scollon, 2003-12-08 *Discourses in Place* is essential reading for anyone with an interest in language and the way we communicate. Written by leaders in the field, this text argues that we can only interpret the meaning of public texts like road signs, notices, and brand logos by considering the social and physical world that surrounds them. Drawing on a wide range of real examples from signs in the Chinese mountains to urban centres in Austria, Italy, North America, and Hong Kong, this textbook equips students with the methodology and models they need to undertake their own research in geosemiotics, the key interface between semiotics and the physical world. *Discourses in Place* is highly illustrated, containing real examples of language in the material world, including a how-to-use this book section, group and individual activities, and a glossary of key terms.

Language and Literature in a Glocal World Sandhya Rao Mehta, 2018-06-29 This collection of critical essays investigates the intersections of the global and local in literature and language. Exploring the connections that exist between global forms of knowledge and their local regional applications, this volume explores multiple ways in which literature is influenced and in turn influences movements and events across the world, and how these are articulated in various genres of world literature, including the resultant challenges to translation. This book also explores the way in which languages, especially English, transform and continue to be reinvented in its use across the world. Using perspectives from sociolinguistics, discourse analysis, and semiotics, this volume focuses on diasporic literature, travel literature, and literature in translation from different parts of the world to study the ways in which languages change and grow as they are sought to be owned by the communities which use them in different contexts. Emphasizing on interdisciplinary studies and methodologies, this collection centralizes both research that theorizes the links between the local and the global and that which shows through practical evidence how the local and global interact in new and challenging ways.

The Routledge Handbook of Migration and Language Suresh Canagarajah, 2017-02-03 Winner of AAAL Book Award 2020, Shortlisted for the BAAL Book Prize 2018. *The Routledge Handbook of Migration and Language* is the first comprehensive survey of this area, exploring language and human mobility in today's globalised world. This key reference brings together a range of interdisciplinary and multidisciplinary perspectives, drawing on subjects such as migration studies, geography, philosophy, sociology, and anthropology. Featuring over 30 chapters written by leading experts from around the world, this book examines how basic constructs such as community, place, language, diversity, identity, nation, state, and social stratification are being retheorized in the context of human mobility. It analyses the impact of the mobility turn on language use, including the parallel multilingual turn and translanguaging. It discusses the migration of skilled and unskilled workers, different forms of displacement, and new superdiverse and diaspora communities. It explores new research orientations and methodologies such as mobile and participatory research, multi-sited ethnography, and the mixing of research methods. It investigates the place of language in citizenship, educational policies, employment, and social services. The Routledge
