Wednesday Is Indigo Blue Richard E. Cytowic,David M. Eagleman,2011-09-30 Revealing the neuroscience and genetics behind synesthesia and how this multi sensory phenomenon changed our view of the brain A person with synesthesia might feel the flavor of food on her fingertips sense the letter J as shimmering magenta or the number 5 as emerald green hear and taste her husband s voice as buttery golden brown Synesthetes rarely talk about their peculiar sensory gift believing either that everyone else senses the world exactly as they do or that no one else does Yet synesthesia occurs in 1 in 20 people and is even more common among artists One famous synesthete was novelist Vladimir Nabokov who insisted as a toddler that the colors on his wooden alphabet blocks were all wrong His mother understood exactly what he meant because she too had synesthesia Nabokov s son Dmitri who recounts this tale in the afterword to this book is also a synesthete further illustrating how synesthesia runs in families Wednesday Is Indigo Blue reveals how the extraordinary multisensory phenomenon of synesthesia has changed our traditional view of the brain Because synesthesia contradicted existing theory researcher Richard Cytowic spent 20 years persuading colleagues that it was a real and important brain phenomenon rather than a mere curiosity Today scientists in 15 countries are exploring synesthesia and how it is changing the traditional view of how the brain works Cytowic and neuroscientist David Eagleman argue that perception is already multisensory though for most of us its multiple dimensions exist beyond the reach of consciousness Reality they point out is more subjective than most people realize No mere curiosity synesthesia is a window on the mind and brain highlighting the amazing differences in the way people see the world **The Power of Thought** John Douglas Sterrett,1896 *A System of Phrenology* George Combe,1876 *From Darkness to Light; Or Duffys' Compendiums of Natures' Law, Forces and Mind Combined in One, Conformable to This, His Great Discovery, that the Sun and Earth are the Poles of the Magnet ...* Terrence Duffy,1893 *From darkness to light, or, Duffy's compendiums of nature's law, forces and mind combined in one ; conformable to this his great discovery, that the sun and earth are the poles of the magnet* Terrence Duffy,1893
