religious education has often been seen as a tool for reinforcing cultural and religious identity. However, as the world becomes more interconnected and religious diversity grows within national borders, RE has increasingly been called upon to play a different role: one that fosters understanding and peaceful coexistence among people of different faiths and worldviews. The volume *Teaching Religious Education: Challenges, Developments, and Current Debates in Comparative Perspective* delves into these complexities, offering a comprehensive exploration of how religious education is taught, debated, and implemented across a diverse range of countries, challenging the Eurocentric focus of much existing research on religious education.

Discovering Islam: Making Sense of Muslim History and Society by Akbar S. Ahmad, 1988. *World Religions 2003* by Michael Wilt, Jeffrey Brodd, Jonathan Yu-Phelps, 2003-01. The Ad Hoc Committee to Oversee the Use of the Catechism has judged that the text falls outside the scope of the types of materials they review for conformity to the Catechism. Why do Muslims face Mecca to pray? Why do Buddhists chant? The major religions of the world are a mystery to many high school teens. Now you can help them unlock the doors of these traditions with our new text *World Religions: A Voyage of Discovery*. The book is an introductory survey that helps eleventh and twelfth graders understand the people, dimensions, and religious principles of the world's major religions. The teaching manual by authors Jonathan Yu Phelps and Michael Wilt, edited by Colleen Cichon Mulcrone, provides additional background information and employs student-centered, active learning strategies. Classroom lesson plans include small group activities, role-play situations, and skits. Case studies, suggestions for interviews and guest speakers, recommendations for audiovisual resources, writing activities, Internet-based activities, and research projects are included. The Ad Hoc Committee to Oversee the Use of the Catechism reviews only materials which are catechetical in nature and which teach the beliefs, practices, and doctrine of the Catholic Faith. *World Religions* falls outside the scope of the types of materials the Committee reviews. This text outlines the basic beliefs and practices of the major religions of the world, taking a comparative approach as do most texts on this topic to identify the distinctive elements of the various religions. This edition of *World Religions* however also includes a very important forward that introduces The Roman Catholic Church and Non-Christian Religions and references documents of the Second Vatican Council. This forward explains the Catholic viewpoint on the importance of learning about and coming to a basic understanding of the other major religions of the world.

Muslims and Others Jacques Waardenburg, 2008-08-22 Jacques Waardenburg writes about relations between Muslims and adherents of other religions After illuminating various aspects of Islam from an outside point of view in his volume *Islam* published in 2002 by de Gruyter his second volume changes the perspective The author shows how Muslims perceived non Muslims particularly Christianity and the West but also Judaism and Asian religions in many centuries of religious dialogue and tensions The main focus is on Muslim minorities in Western countries and on religious dialogues of which he provides first hand knowledge through his participation in several important dialogue meetings After 50 years of research and personal involvement Waardenburg aims at a mutual understanding and reconciliation of Islam and other religions particularly Christianity both on an international level as well as on a more local level where old and new Christian and Muslim Europeans live together

[DISCOVERING SHI'I ISLAM](#) Mohammad Ali Shomali, 2004 The present work is a summarized version of *Shi'i Islam Origins Faith and Practices* 2003 ICAS Press by the same author This shorter version aims to briefly address main issues related to Islam in general and Shi'i Islam in particular These two works represent a modest attempt to fill some of the gaps that exist in the field of Islamic studies in

general and Shi'i studies in particular. Though simply and clearly written, they are outcomes of more than twenty years of involvement in Islamic studies and based to some extent on two series of lectures about Shi'i Islam delivered to English speaking audiences: a first set of some fifty lectures delivered at Jami'at al-Zahra, a prominent Islamic seminary for women in Qum, Iran, in 1995 and 1996, and a second set of some thirty lectures delivered at the Manchester Islamic Institute and the Shi'a Welfare Centre in Manchester, England, in 1998 and 1999. The first chapter begins by expounding both the literal and technical meanings of the term Shi'a, and references are made to statements of famous scholars in this regard. Then it proceeds to study the origins of Shi'i Islam and how it became established. The second chapter studies the sources of Shi'i thought, i.e. the Qur'an, the Sunnah, reason, and consensus. Discussing the status of the Qur'an, the chapter goes on to establish that the Shi'a, like other Muslims, believe that the Qur'an, which is present today, is an embodiment of divine revelation to the Prophet Muhammad. The chapter continues by explaining the second most important source, i.e. the Sunnah, which includes the sayings and actions of the Prophet Muhammad. The Qur'an itself asks Muslims to take the Prophet as their role model, to refer to him to judge and settle their conflicts, and speaks of the Prophet as the one who recites, teaches, and explains the Qur'an. In this chapter, there is also a discussion about the household of the Prophet, Ahlul-Bayt, and their role in presenting the Sunnah. Then there follows a discussion about the importance of reason and its role in understanding Islamic beliefs, values, and practical laws. Finally, there is a discussion about legal consensus and how it is viewed with respect to the Sunnah in the Shi'i teachings. The third chapter studies fundamental doctrines of the Shi'i faith: Along with Unity of God, prophethood, and resurrection, which constitute the principles of religion for Islam and other divine religions, some important additional doctrines, such as divine justice and imamate, are studied. These doctrines may partly be shared by other Muslims, but the Shi'a are those who believe in all of them. The fourth chapter is a very brief account of Shi'i practices, along with brief references to the objectives and principles underlying them. These practices are, in principle, shared by all Muslims, though there may be some differences in particulars among different Islamic schools. The fifth and final chapter is a short discussion about the Shi'a world today. This chapter starts with a brief account of the latest statistics about the present Muslim and Shi'i population of the world. There is also a breakdown of religious affiliations of some countries with a long history of Shi'i presence. Although there are no accurate and approved statistics on the current Shi'a population in the world, efforts have been made here to collect the best available.
