

Effectiveness of the Community Reinforcement Approach (CRA) in the treatment of alcohol dependence: A meta-analysis
C. R. Frone, R. L. K. Stewart, & M. A. Stewart
Several studies have shown that CRA is an effective treatment for alcohol dependence. This meta-analysis examined the effectiveness of CRA in the treatment of alcohol dependence. The analysis included 10 studies with a total of 1,000 participants. The results showed that CRA was significantly more effective than control conditions in reducing alcohol consumption and increasing abstinence. The effect sizes were moderate to large. The findings support the use of CRA as a first-line treatment for alcohol dependence.
