James Howard MACBURNY (and HANCE (Kenneth Gordon)),Kenneth Gordon HANCE,1950 **Discussion in Human Affairs, by James H. McBurney and Kenneth G. Hance** James Howard McBurney,1950 The Discussion of Human Affairs Charles Austin Beard,1936 **Discussion in Human Affairs** James Howard McBurney,Kenneth Gordon Hance,1950 *Reason in Human Affairs* Herbert Simon,1990-07-01 What can reason or more broadly thinking do for us and what can t it do This is the question examined by Herbert A Simon who received the 1978 Nobel Prize in Economic Sciences for his pioneering work on decision making processes in economic organizations The ability to apply reason to the choice of actions is supposed to be one of the defining characteristics of our species In the first two chapters the author explores the nature and limits of human reason comparing and evaluating the major theoretical frameworks that have been erected to explain reasoning processes He also discusses the interaction of thinking and emotion in the choice of our actions In the third and final chapter the author applies the theory of bounded rationality to social institutions and human behavior and points out the problems created by limited attention span human inability to deal with more than one difficult problem at a time He concludes that we must recognize the limitations on our capabilities for rational choice and pursue goals that in their tentativeness and flexibility are compatible with those limits **The Philosophy of Human Affairs** Aristotle,2019-02-06 Aristotle s Ethics and Politics are two separate works dealing with the same subject This subject is what Aristotle calls in one place the philosophy of human affairs but more frequently Political or Social Science In the two works taken together we have their author s whole theory of human conduct or practical activity that is of all human activity which is not directed merely to knowledge or truth The proem to the Ethics is an introduction to the whole subject not merely to the first part the last chapter of the Ethics points forward to the Politics and sketches for that part of the treatise the order of enquiry to be pursued **Chaos, Catastrophe, and Human Affairs** Stephen J. Guastello,2013-05-13 Whether talking about steering a wheelbarrow over rugged terrain or plotting the course of international relations human performance systems involve change Sometimes changes are subtle or evolutionary sometimes they are catastrophic or revolutionary and sometimes the changes are from periods of relative calm to periods of vibrant oscillations to periods of chaos As a general rule more complex systems are likely to produce more complex forms of change Although social scientists have long acknowledged that change occurs and have considered ways to effect desirable change the dynamical processes of change have been poorly understood in the past This volume combines recent advances in mathematics and experimental design with the best available social science theories to produce a new integrated and compact theory of work organizations and social evolution The domains of application extend from human decision making

processes to personnel selection and work motivation work performance under conditions of stress accident and health risk analysis the development of social institutions and economic systems creativity and innovation organizational development and group dynamics and political revolutions and war Relative to other literature on nonlinear dynamical systems theory NDS this book is unique in that it integrates new developments in NDS with substantive psychological theory It builds on many recent developments in organizational theory to show that nonlinear dynamics were often implicit in those works all along The result is an entirely new way of viewing social events understanding change processes and asking questions about social systems This book also contains much new empirical work and explains the newly developed methods for testing these new hypotheses

Reason, Revelation, and Human Affairs James V. Schall, 2001-01-01 This book is intended to serve as an introduction to the thought of James V Schall arguably one of the best perhaps even the only authentically Thomistic political scientist writing today In contrast to main currents in contemporary Thomism Schall remains conversant with the great tradition of political philosophy and therefore appreciates the complex and relatively imprecise nature of political reflection In this book the distinguished theorist addresses a wide range of subjects including the question of overpopulation the thought of Charles McCoy and Leo Strauss the role of Christianity in political philosophy and the challenges that the democratic project pose to human beings perception of the truth As a meditation on practical and theoretical political questions self consciously

proceeding from the perspectives of both nature and grace the book provides a unique picture of what a genuine Thomistic political science might look like *Religion in Human Affairs* Clifford Kirkpatrick,1929 *Science and Human Affairs from the Viewpoint of Biology* Winterton Conway Curtis,1922 Human Affairs ,2000 Heredity and Human Affairs Edward Murray East,1927 **Dissertations and Discussions** John Stuart Mill,1875 *Discussions in Economics and Statistics: Finance and taxation, money and bimetalism, economic theory* Francis Amasa Walker,1899
