glossary but rather the first complete effort to assemble and examine the translation of complex technical EIS language into a vocabulary aimed directly at the lay reader Two major factors are responsible for the confusion over EIS terminology the diversity of professional vocabularies and multiple interpretations of federal regulations Due to the diversity and breadth of professional jargons needed to describe the wide range of EIS subject matter both quantitatively and qualitatively EIS terminology has become a complex amalgam of professional languages The second factor of multiple interpretations of federal regulations contributes to the confusion over EIS procedural terminology providing a disjointed vocabulary charged with individual interpretation As a result of this complexity and confusion the need for a uniform or standard terminology has been advocated by many organizations ranging from the Council on Environmental Quality on the federal level down to city planning departments on the local level *Dictionary Catalog of the Department Library* United States.
