Civilian Participants in the Cultural Revolution Francis Mok, 2019-11-25 In the ten years of the Cultural Revolution political persecutions violation of rights deprivation of freedom violence and brutality were daily occurrences Especially striking is the huge number of ordinary civilians who were involved in inflicting pain and suffering on their comrades colleagues friends neighbors and even family members The large scale and systematic form of violence and injustice that was witnessed differs from that in countries like Chile under military rule or South Africa during apartheid in that such acts were largely committed by ordinary people instead of officials in uniforms Mok asks how we should assess the moral responsibility of these wrongdoers if any for the harm they did both voluntarily and involuntarily After the death of Chairman Mao there was a trial of the Gang of Four who were condemned as the chief perpetrators of the Cultural Revolution Besides tens of millions of officials and cadres who were wrongly accused and unfairly treated were subsequently cleared and reinstated under the new leadership However justice has not yet been fully done because no legal or political mechanism has ever been established for the massive number of civilian perpetrators to answer for all sorts of violence inflicted on other civilians to make peace with their victims and to make amends The numerous civilians who participated need to come to terms with the people they wronged in those turbulent years Justice in general and transitional justice in particular may still be pursued by taking the first steps to clarify and identify the moral burden and responsibility that may legitimately be ascribed to the various types of participant This book will be of interest to anyone who studies the Cultural Revolution of China especially

those who are concerned with the ethical dimension *Bridging the Global Divide on Human Rights: A Canada-China Dialogue* Errol P. policy and the place of science and technology in government David Edgerton also shows how British intellectuals came to think of the state in terms of welfare and decline and includes a devastating analysis of C P Snow s two cultures This groundbreaking book offers a new post welfarist and post declinist account of Britain and an original analysis of the relations of science technology industry and the military It will be essential reading for those working on the history and historiography of twentieth century Britain the historical sociology of war and the history of science and technology

**Professional Ethics** ,2003      **America in Imaginative German Literature in the First Half of the Nineteenth Century** Paul Carl Weber,1926 Examines how the United States was presented to the German reader during the first half of the nineteenth century through imaginative literature Follows this theme chronologically through the literary resources from 1800 to 1850      Columbia University Germanic Studies ,1926      **New Masses** ,1945      The art journal London ,1890

**Culture and Development** Shoshana Grossbard-Shectman,2001 The origin of this special issue of The Annals lies in a conference on the interaction between economics and other disciplines held under the auspices of the Society for the Advancement of Behavioral Economics at San Diego State University One example of fruitful interaction between economics and other disciplines is found in the study of economic development and cultural institutions such as language prescribed gender roles and ethnic identity The articles in this volume offer fresh perspectives on the possible effects of cultural institutions on economic performance and politics Many of the articles also investigate reasons why particular institutions arise and in particular how economic development affects cultural institutions This issue of The Annals offers new perspectives on various aspects of culture related to politics and the economy including democracy corruption women s rights wedding expenditures and ethnic cleansing The articles show that the analyses of economists can be useful in these new areas of application To the extent that these are empirical analyses research by economists does not necessarily differ from that performed by political scientists or sociologists studying similar issues Some of the contributions to this volume show that some ideas found in economic theories even though they were developed in the West are applicable universally and can help us understand cultural institutions While the articles in this collection indicate that applying economic analysis to the study of culture is a productive avenue for research this special issue raises more questions than it answers We are still very far from understanding why cultures differ so dramatically There is room for much further research into the multiple interrelationships between various economic political and cultural institutions In this endeavor we may benefit not only from more economic analysis but also from sociological and anthropological analysis and from cooperation between disciplines We also need more studies of investments in cultural capital by individuals firms families and other groups in part because such studies can help up design strategies and policies that work effectively to promote economic and social development It is hoped that this volume of The Annals reveals the inevitability of dealing with cultural differences between countries and cultural changes over time      **Authentic Though Not Exotic** Fernando Nakpil Zialcita,2005 This collection

of essays offers another way to look at the encounter between the Western and the indigenous. It suggests that through a dialectical process this encounter has generated a broader sense of community that has transcended the kin. Local genius transformed Spanish influences even as it was itself transformed by the latter, resulting in a new culture. Finally, Southeast Asia is a recent construct that should be redefined to reflect the diversity of cultures present in it.
