

Morning Sun

From a horizon
glowing and diffuse,
the morning Sun
rises,
with golden rays
radiating
above and below
a window to the world,
so far
above,
the diffuse Earth
below,
and speeding forward,
a voyager
in time
and space
enters
the
glow

Cosmos Poems:

The Cosmos Trilogy Frederick Seidel, 2003-11-24 You Can't Like Seidel's Poems They're Deliberately Virulent You Can Only Gasp At Their Skill And Daring Their Sickening Warp Their Mercilessness Frederick Seidel's highly acclaimed Cosmos Trilogy is a triple thunderclap of darkness from the poet whom Richard Poirier has recently called the true heir of Walt Whitman and of whose first book Robert Lowell wrote I suspect the possibilities of modern poetry have been changed Here is power that strikes Reversing the course of Dante's Divine Comedy Seidel's trilogy begins in the heavens with The Cosmos Poems and descends passing through the Purgatorio of Life on Earth to arrive in Manhattan in Area Code 212 The Cosmos Poems Frederick Seidel, 2001-04-01 The author shares his poetical observations on the nature of the universe from how it came to be to what is going to happen its smallness and vastness quantum mechanics and the essence of one's identity

Cosmos James Applewhite, 2014-04-14 Throughout his long career James Applewhite has skillfully navigated the world of science through poetry His new book makes no exception fearlessly exploring time and consciousness in relation to the universe as described by Big Bang cosmology and as experienced by human beings in the everyday world Applying experiences from his present day life as well as a multitude of memories from his childhood to scientific theories of the nature of the universe the poet engages in a patient but relentless and finally deeply rewarding quest for a sense of meaning in a cosmos whose dimensions of space and time defy the human capacity to imagine In his quest Applewhite suggests the continuing possibility of a crucial connection to the universe through our seemingly tiny evanescent experiences here on planet Earth The poems in Cosmos help us value the human related dimensions of being all the more as they are discerned against the cosmic vastness We've known for a long time gravity doesn't exist Dr Verlinde said This adherence of all mass to itself is following the vector of energy downward with the thermodynamic arrow which pierces us with our moments The illusion encloses scenes in mind return nonsensically my foot slips on the slick bank and for a moment suspended in falling I know the time slow down seeing the red star sweet gum leaf sliding with the current's surface that holds the late September sky and heat in a thin film Then I pierce it splashing through the rowboat my brother called the Peanut Shell rocking out from the bank while I arise back through the brown creek skin and into air of the dream world I know so well where Henry is laughing from Reading the Science News Cosmos Anna Hubbard Mercur, 1893 A Spray of Cosmos Augusta Cooper Bristol, 1904 **Cosmos** A.
