Discourse On The Method Owc:

The Passions of the Soul and Other Late Philosophical Writings René Descartes, 2015-11-12 Those most capable of being moved by passion are those capable of tasting the most sweetness in this life Descartes is most often thought of as introducing a total separation of mind and body But he also acknowledged the intimate union between them and in his later writings he concentrated on understanding this aspect of human nature The Passions of the Soul is his greatest contribution to this debate It contains a profound discussion of the workings of the emotions and of their place in human life a subject that increasingly engages the interest of philosophers and intellectual and cultural historians It also sets out a view of ethics that has been seen as a radical reorientation of moral philosophy This volume also includes both sides of the correspondence with Princess Elisabeth of Bohemia one of Descartes s keenest disciples and shrewdest critics which played a crucial role in the genesis of The Passions as well as the first part of The Principles of Philosophy which sets out the key positions of Descartes s philosophical system ABOUT THE SERIES For over 100 years Oxford World s Classics has made available the widest range of literature from around the globe Each affordable volume reflects Oxford s commitment to scholarship providing the most accurate text plus a wealth of other valuable features including expert introductions by leading authorities helpful notes to clarify the text up to date bibliographies for further study and much more

The Art of Status Jelena Subotic, Professor of Political Science Jelena Subotic, 2025-10-09 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s Since then there have been national and global social movements demanding the return of looted art This shift has established not only that looting is wrong but more importantly that restitution is morally right As a result of this reframing of what it means to own art an artifact s historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status The same objects that granted states high international status now threaten to provoke status decline In The Art of Status Jelena Subotic examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum Subotic tells the story of these artworks how they were looted how they ended up on display in national museums

and how the art restitution disputes have unfolded While these cases are different in terms of their historical context of looting and ownership claims the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states desire for international status and prestige An in depth and nuanced account of art restitution disputes The Art of Status illuminates the shifting political significance of art on the international stage from ownership to restitution **The N.A.C.S.
