The New Byzantines Sean Mathews,2025 A fresh portrait of Greece s forgotten Near Eastern identity with old cultural political and economic ties reforming in today s turbulent world Caught between wars raging in both Eastern Europe and the Middle East Greece is an island of relative stability Popularly considered the cradle of Western civilisation this is a Christian Orthodox state on the edge of the Islamic world And after a half century of integration into NATO and the EU Greece is now reabsorbing into the Near East as the West fractures and new Middle Eastern powers rise The country s importance as a cultural and geopolitical hybrid is growing Travelling through the region Sean Mathews explores at ground level the tectonic shifts reshaping Europe and the Middle East He meets the last Greek merchants in Cairo and hears from Istanbul s remaining Greeks about Turkey s break with the West In Jerusalem he discovers a budding alliance between Greece and Israel and in a faded Ottoman port he encounters football hooligans loyal to a Russian oligarch This bold reappraisal of Greece as a Near Eastern nation uncovers its Byzantine and Ottoman past as a key to survival in today s chaotic shrinking world

Levant Philip Mansel,2010-11-11 Levant is a book of cities It describes the role of Smyrna Alexandria and Beirut as windows on the world escapes from nationality and tradition centres of wealth pleasure and freedom By their mix of races and religions they challenge stereotypes France and Britain liberated the area through their schools while conquering it through arms They were not only manipulators but manipulated often invited in by local factions Smyrna Alexandria and Beirut were both pacifiers and stimulants of nationalism Nasser was born in Alexandria Smyrna and Beirut became centres of Turkish and Arab nationalism Using unpublished family papers Philip Mansel describes their colourful contradictory history from the beginning of the French alliance with the Ottoman Empire in the sixteenth century to their decline in the mid twentieth century Smyrna was burnt Alexandria Egyptianised Beirut lacerated by civil war Levant is the first history in English of these cities in the modern age Levant is also a challenge from history It is about ourselves it shows how Muslims Christians and Jews live together in cities Levantine compromises putting deals before ideals pragmatism before ideology made these cities work until states reclaimed them for nationalism Smyrna Alexandria and Beirut have a message for today

Reading Games in the Greek Novel Eleni Papargyriou,2017-12-02 How is play constituent in the formation of the Greek modernist novel Reflecting competition with European and North American models as well as internal antagonism with more established literary genres in Greece the novel after the 1930s employed playfulness as a means to demonstrate or even perform its novelty Innovations unexpectedly came from the Greek periphery rather than Athens and the Greek novel swiftly exchanged a passively understood realism for communicative patterns that actively involve the reader and educate him into bringing scraps of plot into a meaningful synthesis Featuring key Greek authors such as Yannis Skarimbos Stratis Tsirkas and Nikos Kachtitsis this is a comprehensive and innovative study of Greek modernist prose fiction and the first of its kind to appear in English Eleni Papargyriou is Lecturer in Modern Greek Literature at Kings College London

Now Urbanism Jeffrey Hou,Benjamin Spencer,Thaisa Way,Ken Yocom,2014-10-10 After more than a century of heroic urban visions urban dwellers today live in suburban subdivisions gated communities edge cities apartment towers and slums The contemporary cities we know are more often the embodiment of unexpected outcomes and unintended consequences rather than visionary planning As an alternative approach for rethinking and remaking today s cities and regions this book explores the intersections of critical inquiry and immediate substantive actions The contributions inside recognize the rich complexities of the present city not as barriers or obstacles but as grounds for uncovering opportunity and unleashing potential Now Urbanism asserts that the future city is already here It views city making as grounded in the imperfect messy yet rich reality of the existing city and the everyday purposeful agency of its dwellers Through a framework of situating grounding performing distributing instigating and enduring these contributions written by a multidisciplinary group of practitioners and scholars illustrate specificity context agency and networks of actors and actions in the re making of the contemporary city

Axial Shift Benjamen Gussen,2019-05-17 This book uses historical analysis constitutional economics and complexity theory to furnish an account of city subsidiarity as a legal ethical political and economic principle The book contemplates subsidiarity as a constitutional principle where cities would benefit from much wider local autonomy Constitutional economics suggests an optimal limit to jurisdictional footprints territories This entails preference for political orders where sovereignty is shared between different cities rather states where capital cities dominate The introduction of city subsidiarity as a constitutional principle holds the key to economic prosperity in a globalizing world Moreover insights from complexity theory suggest subsidiarity is the only effective response to the problem of scale It is a fitness trait that prevents highly complex systems from collapsing The nation state is a highly complex system withinwhich cities function as attractors The collapse of such systems would ensue if there were strong coupling between attractors Such coupling obtains under legal monism Only subsidiarity can make the eventuality of collapse improbable The emergent and self organizing properties of subsidiarity

entail a shift in policy emphasis towards cities with a wide margin of autonomy

International and Transnational Perspectives on Urban Systems Celine Rozenblat, Denise Pumain, Elkin Velasquez, 2018-05-08 This book reviews the recent evolutions of cities in the world according to entirely revised theoretical fundamentals of urban systems It relies on a vision of cities sharing common dynamic features as co evolving entities in complex systems Systems of cities that are interdependent in their evolutions are characterized in the context of that dynamics They are identified on various geographical scales worldwide regional or national Each system exhibits peculiarities that are related to its demographic economic and geopolitical history and that are underlined by the systematic comparison of continental and regional urban systems following a common template throughout the book Multi scale urban processes whether local one city or within national systems systems of cities or linked to the expansion of transnational networks towards global urban systems throughout the world over the period 1950 2010 are deeply analyzed in 16 chapters This global overview challenges urban governance for designing policies facing globalization and the subsequent ecological transition The answers which emerge from the diversity of situations in the world add some reflections on and recommendations to the urban system framework proposed in the Habitat III agenda
