Driving Mr Albert A Trip Across America With Einsteins Brain:

Driving Mr. Albert Michael Paterniti, 2013-07-24 Albert Einstein's brain floats in a Tupperware bowl in a gray duffel bag in the trunk of a Buick Skylark barreling across America. Driving the car is journalist Michael Paterniti. Sitting next to him is an eighty-four-year-old pathologist named Thomas Harvey who performed the autopsy on Einstein in 1955 then simply removed the brain and took it home. And kept it for over forty years. On a cold February day the two men and the brain leave New Jersey and light out on I 70 for sunny California where Einstein's perplexed granddaughter Evelyn awaits. And riding along as the imaginary fourth passenger is Einstein himself an id-driven genius the original galactic slacker with his head in the stars. Part travelogue part memoir part history part biography and part meditation *Driving Mr Albert* is one of the most unique road trips in modern literature.

Einstein's Brain Sal Restivo, 2019-11-19 This book reviews the research on Einstein's brain from a sociological perspective and in the context of the social brain paradigm. Instead of Einstein the genius of geniuses standing on the shoulders of giants Restivo proposes a concept of Einstein the social being standing on the shoulders of social networks. Rather than challenging Einstein's uniqueness or the uniqueness of his achievements the book grounds Einstein and his achievements in a social ecology opposed to the myths of the I individualism and the very idea of genius. Einstein is defined by the particular configuration of social networks that he engaged as his life unfolded not by biological inheritances.

He reports that numerical competency is deeply rooted in our biological ancestry; it can be traced through both the evolution of our species and the development of our individual minds. It is not as it has been traditionally explained based on our ability to use language. We owe our symbolic mathematical skills to the nonsymbolic
