Multi-Hazard Early Warning and Disaster Risks Dilanthi Amaratunga, Richard Haigh, Nuwan Dias, 2021-09-11 This book presents a collection of papers under the theme of multi hazard early warning and disaster risks These were selected from the presentations made at the International Symposium on Tsunami and Multi Hazard Risks Early Warning and Community Awareness in supporting implementation of the Sendai Framework for Disaster Risk Reduction 2015 2030 This conference aimed to recognize achievements and to highlight work that still needs to be carried out The conference promoted collaboration among academia research institutions and disaster management offices and further encouraged multidisciplinary and multi sectoral interaction This International Symposium on Multi Hazard Early Warning and Disaster Risk Reduction provided an important opportunity to reflect upon our progress to date in tackling disaster risk but also to consider some of the challenges and opportunities that lay ahead of us A particular focus of this event was Multi Hazard Early Warning During the negotiations for the Sendai Framework countries and partners highlighted the need to

- 1 Continue to invest in develop maintain and strengthen people centred end to end early warning systems
- 2 Promote the application of simple and low cost early warning equipment and facilities
- 3 Broaden the dissemination channels for early warning information to facilitate early action

Countries also called for the further development of and investment in effective nationally compatible regional multi hazard early warning mechanisms To address these needs global Target g of the Sendai Framework was adopted namely to substantially increase the availability of and access to multi hazard early warning systems and disaster risk information and assessments to the people by 2030 As illustrated by recent events in Indonesia it is also vital to address the challenge of cascading hazards that pose a tsunami risk and the importance of linking tsunami early warning to a multi hazard environment However moving towards a multi hazard environment is complex and poses many challenges but can bring significant benefits in terms of efficiencies and also in recognising the links between hazards such as cascading threats We very much hope that this book will provide an important platform to address these and other challenges in addressing disaster risk as well as supporting implementation of the Sendai Framework for Disaster Risk Reduction

Decolonial Gestures in Global Health Gerald M. Boodoo, 2026-02-28 Global health care standards have centered white colonial Euro US priorities in research prevention and treatment They have denigrated the needs and resources of colonized populations However calls have been growing to dismantle the enduring colonial structures and attitudes of global health This volume written by healthcare professionals from differing cultures and a range of disciplines hears those calls Rethinking healthcare from a decolonial perspective it suggests what certain aspects of global health could look like Its goal is not just to acknowledge the needs of non Western populations but to pluriversalise the field of global health Suitable for all who are interested in global health whether at the academic or practitioner levels this volume focuses on issues of equity in

healthcare from multiple perspectives Desiring to engage all who are curious about decolonizing global health but are not quite sure how to go about it these chapters give theoretical and practical approaches to the problem These are not seen as definitive solutions but as gestures toward creating more just and fair minded practices in global health *Federal Register* ,2001-08 [The Science of Beach Lifeguarding](#) Mike Tipton,Adam Wooler,2016-01-06 The World Health Organization s recently published Global Report on Drowning found that drowning is the third leading cause of unintentional injury death worldwide making the information presented in this new book an important part of the global effort to reduce this health risk Written by leading researchers and academics from around the world The Science of Beach Lifeguarding focuses on the scientific evidence that underpins what is taught to and practised by beach lifeguards It is the first book to pull together all the different areas involved in beach lifeguarding and evaluate their evidence base An accessible and informative reference underpinned by the best current research the book s key themes cover the context of beach lifeguarding the physical environment in which lifeguards work medical aspects practical lifeguarding techniques physiological standards for lifeguards safety education and future developments in beach lifeguarding The book presents groundbreaking work quantifying the scientific rationale behind a universally accepted fitness standard It supplies an in depth examination of the risks and hazards associated with the beach environment including rip currents and cold water immersion The book includes a state of the art review of drowning and a comprehensive chapter on first aid Detailing the recently announced 2015 European Resuscitation Council Guidelines this book is a must have for beach lifeguards beach lifeguard managers search and rescue personnel paramedics sports scientists health and safety practitioners and occupational health practitioners
