Drug Calculations Online teaches strong math skills and provides a platform to use these skills in completing drug calculations and administration. This online course is unique, innovative, and affordable. It combines dynamic content, practice, and assessment into one resource that can be used in the classroom or home. A full Course Introduction orients you to Drug Calculations Online, which is organized into 16 modules. Includes the four major drug calculation methods: ratio and proportion, formula, fractional equation, and dimensional analysis, so you can use the method which works best for you. Follows recommendations from The Joint Commission (TJC) and the Institute for Safe Medication Practices (ISMP) for use of acceptable abbreviations and dose designations, and QSEN (Quality and Safety Education for Nurses). Many of the math practice problems include tutorials for each of the four drug calculation methods, providing step-by-step solutions for the problem. Animations are used throughout this course to demonstrate techniques of drug administration, such as how to mix two medications in a syringe or withdrawing medication from an ampule. Case studies that consist of realistic patient scenarios are provided. Interactive self-assessment activities related to various topic areas are incorporated throughout the course to allow you to apply your knowledge in context. Engaging audio commentary enhances the step-by-step explanation of math skills and drug calculation methods. Includes an audio glossary with drug calculation and medical-related terms.

Drug Calculations Online to Accompany Clinical Calculations Joyce LeFever Kee, Sally M. Marshall, Carmen Adams, 2004-03. This online drug calculations course consists of 11 modules corresponding to the parent text Kee Clinical Calculations 5th Edition. Through the online Evolve course management system, this learning tool serves as a complete drug calculations program to teach and reinforce good math skills. Because each module works with the textbook, students can read chapter content and then apply and practice what they have learned online through repetition, practice problems, animations, and interactive activities. Available as a package with the text for student savings. This online course provides extensive math instruction to help students master the basic skills needed to accurately and effectively calculate drug dosages. The content includes all four major drug calculation methods: ratio, proportion, formula, fractional equation, and dimensional analysis, to expose the user to all calculation methods so they can choose their preferred method. Each module is organized by topic sections that include an overview, objectives, a reading assignment, example problems, practice problems, and quizzes. All of the math practice problems include Solution Buttons for each of the four drug calculation methods, giving the user a step-by-step tutorial for solving the problem. Animations are used throughout the course to demonstrate various concepts related to drug administration. Interactive self-assessment activities, such as matching, sequencing, labeling, and multiple select activities, similar to the types of questions now seen on the NCLEX examination, allow students to apply their knowledge in context. Engaging audio commentary enhances the step-by-step explanation of math skills and drug calculation methods, in addition to livening up instruction and discussion. Quizzes within each module allow students to test their knowledge of all major topics covered in that particular section. Comprehensive test bank is included to help the instructor build quizzes and tests. Information on the

latest drug administration techniques and devices includes detailed explanations of oral intravenous intramuscular subcutaneous and various other routes used in drug administration Material on the most up to date commonly used drugs provides exposure to what is being used in the real world of clinical practice Information on infusion pumps helps users understand their increasing role in drug administration
