Drugs Health Issues:

A Handbook on Drug and Alcohol Abuse Gail Winger, James H. Woods, Frederick G. Hofmann the late, 2004-06-03 This comprehensive text on the pharmacological medical and legal aspects of drug abuse has been thoroughly updated for the Fourth Edition and a new chapter on club drugs added The chapter on medical effects was completely rewritten to focus on infections that develop in i v drug abusers and information on the international regulation of drug use was added to the chapter on drug abuse and the law The book is written at a level appropriate for upper level undergraduate students graduate or medical students and drug counselors All major drugs of abuse are covered tobacco opioids central stimulants including cocaine amphetamine and caffeine alcohol and other sedatives marijuana club drugs MDMA GHB and ketamine hallucinogens and volatile solvents For each type the authors discuss history and culture the characteristic patterns of use subjective and physiological effects mechanisms of pharmacological action and toxic effects Epidemiological aspects are discussed as well as pharmacological treatment possibilities where applicable

Drugs, Ageing and Society Bruce Burns, Chris Phillipson, 2024-05-10 During the 1970s and 1980s prescription and over the counter drugs had come to play a major role in the health care of older people Originally published in 1986 this book reviews the historical background to this development and explores its social and pharmacological implications The main aim of the study was to provide a critical perspective on drug use together with a framework for developing effective prescribing policies The authors do not in developing their arguments reject the enormous value of drugs in the treatment of many illnesses affecting older people they do however criticise excessive as well as inappropriate prescribing The intention was to provide some practical illustrations of how the harmful effects of drug use can be curtailed This book was aimed in particular at workers in the health services for example doctors health visitors district nurses pharmacists the professions allied to medicine However it should also be of interest to other groups such as social workers carers support groups and older people themselves

Morality Politics in American Cities Elaine B. Sharp,Yvette M. Alex-Assensoh,2005 Topless bars casino gambling needle exchange programs for drug addicts there s no question morality issues remain front and center in urban politics Presenting a systematic analysis of culture war issues at the local level Elaine Sharp shows how American cities deal with these ongoing concerns Drawing on a sample of ten strategically chosen cities she explains differences in how municipalities respond to controversies surrounding sex business abortion clinics legalized gambling gay rights and drug use By analyzing the relative importance of subculture economics and institutional arrangements in the disputes she points the way toward richer and more complete understanding of how different cities respond differently to these hot button issues Far more than a statistical study **Morality Politics in American Cities** is a collection of fascinating stories of real people grappling with down to earth issues and real life drama richly informative case studies that will captivate students and interested citizens alike Mayors public health directors activists and others speak their minds about the pros and cons of these controversies Here are officials in one city confronting the Vatican over funding for abortion services those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members and still others mounting a massive community sponsored attack on topless clubs These stories provide detailed evidence to support classifications needed for comparing cities experience with each of the five morality issues They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues Overall the study shows that cultural factors usually dominate policymaking in local politics except when specific economic interests are at stake and also observes that county level governments are more important than previously thought in terms of morality issue decisions As

provocative as it is informative Morality Politics in American Cities demonstrates that such issues same sex marriage for example are multidimensional and often difficult to resolve Its conclusions however contingent mark an important step in the ongoing process of understanding important differences in approaches to these issues and clearly show how moral conflicts continue to define American politics
