Drugs, Alcohol, Pregnancy and Parenting I.J. Chasnoff,2012-12-06 The Interfaces of Perinatal Addiction Ira J Chasnoff In the last few years problems associated with drug use in pregnancy have become endemic As cocaine has become the drug of choice for millions of Americans including pregnant women as AIDS has become more commonly recognized in women and infants and as legal cases have begun to raise the question of fetal abuse no professional group has come forward to serve as advocate for this special population of substance abusers Meanwhile however physicians nurses social service agencies and public health officials have all been faced with increasing numbers of infants showing the detrimental effects of their mothers drug use Although problems of substance abuse in pregnancy have received increasing attention in the medical literature since the early 1970s there has recently been a very rapid increase in the number of articles published related to this field The reasons for this new interest are easily understood when current statistics from the National Institute on Drug Abuse are reviewed 1 Although patterns of abuse of alcohol marijuana heroin and other substances by women of childbearing age have changed very little over the last ten years the incidence of cocaine use in this special population has been rising rapidly a reflection of cocaine s increasing popularity among the general population of the United States

The Mystery of Risk Ira J. Chasnoff,2010 The ill effects of a baby s exposure to drugs and alcohol while in the womb are demonstrated in this essential reference with cutting edge information from the fields of medicine neuroscience and child psychology These findings posit that many of the learning and behavior problems seen in children from poor school performance to patterns of impulsivity often diagnosed as ADHD are both treatable and preventable The book first traces the history of fetal malformation back to the time of Aristotle then presents a resounding call for integrated systems of care for high risk children and their families Methods for applying behavior management and treatment techniques are included for health care practitioners social workers early childhood intervention specialists special education teachers and parents whether for use at home at school or in the clinical setting

I Would Be Loved Linda Falkner,2002 In the early 1990s at the peak of the crack cocaine epidemic the author Linda Falkner became a foster parent Most of her children were infants who had been exposed to alcohol and drugs Trying to help these children fit into her home and the world was only the beginning of the challenges she and her family faced I WOULD BE LOVED is about kids who were damaged by drugs alcohol abuse and by the system meant to protect them The older foster children had been emotionally physically and often sexually abused One foster child a girl named Pixie came to live with the Falkner family after leaving foster care at eighteen She had grown up in hundreds of foster homes and was severely mentally ill Pixie lived with the Falkner s on and off for ten years In that time they taught her many life skills and tried to let her know that she is loved but that was the hardest lesson of all for her to learn I Would Be Loved is Pixie s story as much as it is Linda s
