**Researching Theories of Crime and Deviance** Charis Elizabeth Kubrin,Thomas Dain Stucky,Marvin D. Krohn,2009 This new book from noted criminologists Charis Kubrin Thomas Stucky and Marvin Krohn is a unique supplement for criminological theory courses graduate level research methods courses or seminars that take a close look at the development of criminological theory and or methods This book is intended to bridge the gap between theory and research in the study of crime and deviant behavior There are a number of textbooks that provide excellent summaries of criminological theories Many of these include critiques of the theories discussing the empirical evidence that has been rendered in support or not of those theories However empirical evidence is only as good as the research methods that were used to generate it Theory texts do not critically evaluate the research methods that generate the findings they cite The student therefore obtains an impression of the utility of the theory based on an uncritical assessment of the research evidence The purpose of this book is to explicitly assess the research methods that have been used to test nine theoretical perspectives of crime Specifically the authors focus on sampling measurement and analytical issues in doing theoretically directed research [International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences](#) ,2002 **Criminology** Freda Adler,Gerhard O.
