Blank,2019-06-26 Human genetic technology has advanced rapidly in recent years to the point where amniocentesis is commonplace and in vitro fertilization has been successful On the horizon looms the specter of human cloning and genetic engineering raising a storm of new moral and ethical questions These questions asserts the author are not the only ones to be considered the impact and role of public policy are equally critical What part should the state play in human genetic intervention To what extent does a democratic society have the duty to take steps to reduce genetic disease and improve the quality of life through genetic engineering If society has such responsibility at what stage does societal good preempt individual rights What is society's obligation toward future generations and is genetic manipulation justifiable on these grounds After surveying the state of the art the author grapples with these questions

contending that decisions ultimately will not be based on ethical and moral grounds they will be fought out in the political arena
