Jana,Sudhanshu Maurya,Ines Chihi,2024-11-20 Artificial Intelligence based Solutions for Industrial Applications aims to examine the utilization of artificial intelligence AI technologies to tackle difficult industrial issues and offers readers a thorough understanding of how these technologies are being employed to address intricate industrial challenges and to stimulate innovation This book explores the fundamental principles of artificial intelligence AI and its practical use in industrial environments This book improves understanding of core concepts the present state of the art and real time implementation of AI in many industrial applications This book describes the detailed implementation of AI in the industrial sector as well as related case studies for in depth understanding Basic concepts related work reviews illustrations empirical results and tables are integrated within

each chapter to give the readers the opportunity to gain maximum knowledge and to easily understand the methodology and results presented This book introduces a variety of smart algorithms to help in filtering important information and to solve problems in the application domains Application of machine learning and deep learning in the industry demonstrates the capabilities by which it may be used to solve practical problems in the Fourth Industrial Revolution and it equips readers with the necessary knowledge and tools to design solutions by themselves with the help of theory and practical examples dealt with The fourth industrial revolution and its consequences on society and organizations are discussed in this book Features Detailed understanding of the industrial application of AI Discussion of core concepts of different machine learning and deep learning techniques such as artificial neural networks support vector machines K nearest neighbour decision tree logistic regression and many more Detailed study on various industrial applications of machine learning and deep learning in healthcare education entertainment share market manufacturing and many more Case studies on industrial application of AI Summation of the fourth industrial revolution and its consequences on society and organizations This book is primarily written for graduate students engineers and academic researchers industrial practitioners and anyone who wants to optimize production processes explore AI technology or stay ahead in the industrial field It covers the complexities of AI in industrial contexts from core basic understanding to complex implementation

Digital Storytelling Leah Henrickson, 2025-11-10

We tell stories to make sense of chaos We come to understand the world and our places in it through these stories And we share these stories with others finding points of connection Storytelling is part of who we are and with digital media its more accessible and adaptable than it has ever been Since emerging in the 1990s the field of digital storytelling has centred on a single model of story creation that remains in widespread use today However digital media environments and communities have changed Its time for the field of digital storytelling to change with them Digital Storytelling provides a new cutting edge introduction to this topic It sets an alternative agenda for the field one that regards digital storytelling as characterised not by any particular kind of method or output but by ongoing processes of meaning making in digital environments Weaving historical references throughout this textbook illustrates the interconnectedness of media individual experiences and society and culture It shows that digital storytelling is a particular context of storytelling that has emerged from a confluence of traditions and technologies forever in flux This original and landmark textbook is required reading for students of media communications sociology cultural studies and English as well as for anyone looking to understand the transformative power of digital storytelling in all of its forms

AI Impacts on Branded Entertainment and Advertising Miguélez-Juan,

Blanca, Rebollo-Bueno, Sara, 2025-05-01 Connecting with the public especially the younger generations is challenging for brands and agencies unless they leverage new communication technologies to create engagement and foster more critical and active audiences Consumers often overwhelmed by messages and products no longer need to avoid intrusive advertising Instead in this new advertising paradigm they seek out brands and their advertisements to form a positive emotional

connection This intimate bond benefits both the brand and the consumer acting as a loudspeaker for the brand's values and message In this context creativity and professional creatives are reaffirmed as the key differentiators for modern advertising agencies These agencies need well trained professionals who are not afraid to use new communication methods including entertainment and emerging technologies like AI which despite being unregulated are here to stay AI Impacts on Branded Entertainment and Advertising explores the scientific foundations on the use of AI and branded content understanding it as an essential tandem for the understanding of the advertising and social reality Covering topics such as non conventional media influencer marketing and avatar this book is an excellent resource for marketing directors brand creators communication professionals computer developers corporate professionals researchers scholars professionals academicians and more
