Chemisorption Gerd Wedler,1970 **Chemisorption** Gerd Wedler,1976 *Experimental Methods for Evaluation of Hydrotreating Catalysts* Jorge Ancheyta,2020-06-08 Presents detailed information and study cases on experiments on hydrotreating catalysts for the petroleum industry Catalytic hydrotreating HDT is a process used in the petroleum refining industry for upgrading hydrocarbon streams removing impurities eliminating metals converting asphaltene molecules and hydrocracking heavy fractions The major applications of HDT in refinery operations include feed pretreatment for conversion processes post hydrotreating distillates and upgrading heavy crude oils Designing HDT processes and catalysts for successful commercial application requires experimental studies based on appropriate methodologies *Experimental Methods for Evaluation of Hydrotreating Catalysts* provides detailed descriptions of experiments in different reaction scales for studying the hydrotreating of various petroleum distillates Emphasizing step by step methodologies in each level of experimentation this comprehensive volume presents numerous examples of evaluation methods operating conditions reactor and catalyst types and process configurations In depth chapters describe experimental setup and procedure analytical methods calculations testing and characterization of catalyst and liquid products and interpretation of experiment data and results The text describes experimental procedure at different levels of experimentation glass reactor batch reactor continuous stirred tank reactor and multiple scales of tubular reactors using model compounds middle distillates and heavy oil This authoritative volume Introduces experimental setups used for conducting research studies such as type of operation selection of reactor and analysis of products Features examples focused on the evaluation of different reaction parameters and catalysts with a variety of petroleum feedstocks Provides experimental data collected from different reaction scales Includes experiments for determining mass transfer limitations and deviation from ideality of flow pattern Presents contributions from leading scientists and researchers in the field of petroleum refining *Experimental Methods for Evaluation of Hydrotreating Catalysts* is an indispensable reference for researchers and professionals working in the area of catalytic hydrotreating as well as an ideal textbook for courses in fields such as chemical engineering petrochemical engineering and biotechnology

Experimental Methods in Catalytic Research Robert B. Anderson,2013-10-22 *Experimental Methods in Catalytic Research* Volume I provides a useful account of procedures in various areas of catalytic research This book describes the method and its fundamental principles the apparatus used the data obtained and their interpretation and the account of the special problems related to catalytic research Organized into 11 chapters this volume begins with an overview of the kinetic phenomena such as quantitative studies of reaction rate and factors influencing rate This text then examines the general properties that are of major importance to catalysis since catalytic rates depend mainly on available active surface Other chapters consider the detailed mechanism of any catalytic reaction which include the electronic structure of the chemisorption bond This book discusses as well several experimental methods developed to study surface reactions under

highly idealized conditions The final chapter deals with the phenomenon associated with the spin of an electron This book is a valuable resource for chemical engineers *Experimental Methods in Catalytic Research* Peter T.
