Anne Morris Mertz

Chepstow Castle:

The Idea of the Castle in Medieval England Abigail Wheatley, 2004 Medieval castles have traditionally been explained as feats of military engineering and tools of feudal control but Abigail Wheatley takes a different approach looking at a range of sources usually neglected in castle studies Evidence from contemporary literature and art reveals the castle's place at the heart of medieval culture as an architecture of ideas every bit as sophisticated as the church architecture of the period This study offers a genuinely fresh perspective Most castle scholars confine themselves to historical documents but Wheatley examines literary and artistic evidence for its influence on and response to contemporary castle architecture Sermons seals and ivory caskets local legends and Roman ruins all have their part to play What emerges is a fascinating web of cultural resonances the castle is implicated in every aspect of medieval consciousness from private religious contemplation to the creation of national mythologies This book makes a compelling case for a new interdisciplinary approach to castle studies
ABIGAIL WHEATLEY studied for her PhD at York University's Centre for Medieval Studies

Morris Migration Anne Morris Mertz, 2009-05-01 This historical narrative spans three centuries from Cromwell's time to the present It documents the English heritage of several Mayflower Pilgrims including antecedents of Sarah Cushman 1766 1842 the Welsh environment of John Morris c1677 and

Life in a Medieval Castle Joseph Gies, Frances Gies, 2010-07-30 The definitive classic used as a source for Game of Thrones The Gieses succeed in making a remote and unfamiliar world accessible Kirkus Reviews A bestseller by two widely respected historians Joseph and Frances Gies's *Life in a Medieval Castle* remains a timeless work of popular medieval scholarship Focusing on Chepstow an English castle on the Welsh border that survived the turbulent Middle Ages with a relative lack of violence the book offers an exquisite portrait of what day to day life was actually like during the era and of the key role the castle played The Gieses take us through the full cycle of a medieval year dictated by the rhythms of the harvest We learn what lords and serfs alike would have worn eaten and done for leisure and of the outside threats the castle strove to keep at bay The authors allow medieval man and woman to speak for themselves through selections from past journals songs

study of nineteenth century 3D photography and its relation to the picturesque tradition in art literature and tourism The
study focuses on the invention of the stereoscope originally a laboratory device for demonstrating the nature of three
dimensional vision and the simultaneous invention of photography in order to show how early stereo photographers used the
optics of the stereoscope to extend the possibilities of picturesque representation Their images also made virtual travel
possible for an international mass audience allowing millions of people to explore places and natural wonders that they would
otherwise never have seen Many of these places had deep literary associations Wordsworth s Lake District for instance or
Scott s Trossachs and the stereography of these regions constitutes an important yet largely unexplored chapter in the
reception history of these authors Many of the photographs were deliberate attempts to encourage the preservation of
environmentally sensitive sites something the realism of photography and the 3D presentation of the stereoscope made
especially effective The Stereoscopic Picturesque combines fields of study that have rarely been brought into such close
contiguity the history of science art history the history of photography literature and environmentalism The result is an
unprecedented look at Victorian popular culture and the way stereo photography shaped their ways of seeing the world
