**Palestine** Nur Masalha, 2018-08-15 This rich and magisterial work traces Palestine's millennia-old heritage uncovering cultures and societies of astounding depth and complexity that stretch back to the very beginnings of recorded history. Starting with the earliest references in Egyptian and Assyrian texts, Nur Masalha explores how Palestine and its Palestinian identity have evolved over thousands of years from the Bronze Age to the present day. Drawing on a rich body of sources and the latest archaeological evidence, Masalha shows how Palestine's multicultural past has been distorted and mythologised by Biblical lore and the Israel-Palestinian conflict. In the process, Masalha reveals that the concept of Palestine, contrary to accepted belief, is not a modern invention or one constructed in opposition to Israel, but rooted firmly in ancient past. Palestine represents the authoritative account of the country's history.

**Mineral Deposits and Occurrences in the Arabian-Nubian Shield** Ahmed Hassan Ahmed, 2022-03-18 This book presents a detailed review of the mineral deposits and occurrences in the Arabian Nubian Shield (ANS) including their distribution, mineralization styles, economic importance, and geological controls on the mineralization. The purpose of the book is to compile the results of past and recent investigations on mineral deposits and occurrences in the ANS that cover the countries of Saudi Arabia, Yemen, Egypt, Sudan, Eritrea, and Ethiopia. In this regard, it discusses in detail the various genetic mineralization styles in the ANS, including: 1) magmatic mineral deposits associated with mafic-ultramafic rocks (e.g., chromite, Ni, Cu, Co, PGE, magmatic sulfides, Fe, Ti, V oxides); 2) intrusion-related magmatic-hydrothermal deposits associated with felsic to intermediate rocks (porphyry, epithermal, Au-Ag sulfide vein type, family skarn, granite-related pegmatite, REE deposits); 3) hydrothermal orogenic gold and volcanogenic massive sulfide (VMS) deposits; as well as 4) surficial mineral deposits (chemical, sedimentary, residual, mechanical, and supergene enrichment deposits).

**The Articulation of Early Islamic State Structures** Fred M. Donner, 2017-05-15 This volume reprints nineteen articles that deal with the formation of the first Islamic state under the rightly-guided and Umayyad caliphs (632-750 CE). The articles, five of which originally appeared in languages other than English and are translated here, trace the crystallization of key institutions of the growing empire and treat such fundamental issues as taxation, military institutions, administrative organization, and practices, the barid or official courier and intelligence service, succession, the ruling elites, and their income, and questions of legitimation. The volume includes an introduction by the editor that offers an overview of the processes involved and helps place each article in its proper context. It also offers an extensive bibliography of further works relevant to the theme of the volume.
