ARCHAEOLOGY](#). Jean-Claude Gardin, 1980 **Archeologia e Calcolatori, 30, 2019** Marco Arizza, Valeria Boi, Alessandra Caravale, Augusto Palombini, Alessandra Piergrosi, 2019-11-28 Il volume 30 di *Archeologia e Calcolatori* si apre con un inserto speciale dedicato al trentennale della rivista Alle introduzioni di F Djindjian e di P Moscati

che delineano un quadro dell'informatica archeologica nel suo divenire seguono gli articoli dei membri del Comitato di Redazione a testimoniare l'attività di ricerca e di sperimentazione che ha caratterizzato il cammino editoriale della rivista e il contributo di una giovane laureata dell'Università Bocconi che ha lavorato a stretto contatto con il team di Archeologia e Calcolatori. Nella parte centrale sono pubblicati gli articoli proposti annualmente dagli autori. Ne emerge un quadro che rappresenta gli aspetti applicativi più qualificanti dell'informatica archeologica: le banche dati, i GIS, le analisi statistiche, i sistemi multimediali, ma che guarda oggi con sempre maggiore interesse agli strumenti di visualizzazione scientifica e di comunicazione delle conoscenze. Il volume si chiude con gli Atti del XII Workshop ArcheoFOSS Free Libre and Open Source Software e Open Format nei processi di ricerca archeologica, un'iniziativa lodevole nata nel 2006 cui si è dato spazio nelle pagine della rivista.

The Dark Abyss of Time Laurent Olivier, 2024-01-09. The field of archaeology continues to face a major crisis of interpretation. The traditional view is that the basic business of archaeology is to reconstruct the history of cultures and civilizations through their material productions. Olivier challenges this view with a new approach to archaeological remains based on the works of French theorists such as Foucault, de Certeau, and Derrida, with insight from Darwin and Freud. His thesis is that archaeology does not study the past itself but rather what materially remains of the past in our present. Olivier also develops an interpretation of material culture based on Aby Warburg's and Walter Benjamin's work in the anthropology of art. With wider implications for history and all social sciences, *The Dark Abyss of Time* is a major contribution to the theory of time, memory, heritage, and archaeology. This flawless translation makes Olivier's elegantly written work available in English for the first time.

Mitigation of Construction Impact on Archaeological Remains Matthew James Davis, 2004. This volume will be an invaluable asset to all archaeologists involved in fieldwork and site management. In the modern environment of developer-funded archaeology, commercial development, and site preservation, there are more and more cases where archaeological sites are being impacted upon by various forms of construction. In order to understand and protect the historic environment wherever possible, archaeologists are faced with the crucial task of making decisions on how best to combine the needs of development whilst maintaining our archaeological heritage. Yet the majority of archaeologists have only limited knowledge of the great range of construction practices and how these can impact upon archaeological deposits and structures. This book has been researched and produced with these problems in mind to inform and assist archaeologists in making decisions where sites may be threatened by development. Extensive information on the range of construction techniques, as well as a range of suggested strategies to mitigate the impact of the techniques outlined, is provided. The information on construction types and impacts is supported by an annotated literature review, case studies, a series of technical appendices of engineering processes, and a data base of mitigation/preservation in situ case studies collected from the British archaeological community.

Archaeology as Historical Science Bruce G. Trigger,1985 This monograph will examine certain general aspects of nature and orientation of prehistoric archaeology paying particular attention to its relationship to the disciplines of history and anthropology I do not intend merely to criticize views currently held by many of the most articulate and influential prehistoric archaeologists in the United States and increasingly elsewhere but will offer what I hope will be convincing alternatives to these views For historical reasons that will be made clear later prehistoric archaeology has long been regarded in the United States almost exclusively as a branch of anthropology This view has acquired even greater prominence as a result of the New Archaeology s desire to demonstrate that archaeological data are as useful as ethnographic ones for generalizing about human behaviour Only recently have some United States archaeologists begun to question whether archaeology might not develop more satisfactorily if it did not seek to model its procedures exclusively upon those of ethnology or social anthropology e g Meltzer 1979 654 Kohl 1981 Leone 1982 This suggests that prehistoric archaeologists in the United States may be more receptive than they have been for some time to considering the value of archaeological orientations developed in other countries or alternative approaches to archaeology in their own Introduction
