Archaeologists Toolkit:

A Companion to Archaeology John Bintliff, 2008-04-15 *A Companion to Archaeology* features essays from 27 of the world's leading authorities on different types of archaeology that aim to define the field and describe what it means to be an archaeologist. Shows that contemporary archaeology is an astonishingly broad activity with many contrasting specializations and ways of approaching the material record of past societies. Includes essays by experts in reading the past through art, linguistics, or the built environment and by professionals who present the past through heritage management and museums. Introduces the reader to a range of archaeologists: those who devote themselves to the philosophy of archaeology; those who see archaeology as politics or anthropology; and those who contend that the essence of the discipline is a hard science.

The Routledge Handbook of Archaeology and the Media in the 21st Century Lorna-Jane Richardson, Andrew Reinhard, Nicole Smith, 2024-06-20 *The Routledge Handbook of Archaeology and the Media in the 21st Century* presents diverse international perspectives on what it means to be an archaeologist and to conduct archaeological research in the age of digital and mobile media. This volume analyses the present-day use of new and old media by professional and academic archaeology for leisure, academic study, and/or public engagement and attempts to provide a broad survey of the use of media in a wider global archaeological context. It features work on traditional paper media, radio, podcasting, film, television, contemporary art, photography, video, games, mobile technology, 3D image capture, digitization, and social media. Themes explored include archaeology and traditional media, archaeology in a digital age, archaeology in a post-truth era, and the future of archaeology. Such comprehensive coverage has not been seen before, and the focus on 21st-century concerns and media consumption practices provides an innovative and original approach. *The Routledge Handbook of Archaeology and the Media in the 21st Century* updates the interdisciplinary field of media studies in archaeology and will appeal to students and researchers in multiple fields, including contemporary public, digital, and media archaeology and heritage studies and management. Television and film producers, writers, and presenters of cultural heritage will also benefit from the many entanglements shared here between archaeology and the contemporary media landscape. [Making Archaeology Happen](#)

Martin Oswald Hugh Carver, 2016-06-16 *Archaeology is for people* is the theme of this book. Split between the academic and commercial sectors, archaeological investigation is also deeply embedded in the needs of local communities, making it simultaneously an art, science, and social science. Such a multi-disciplinary discipline needs special methods and creative freedom, not repetitive responses. Carver argues that commercial procedures and academic theory are both suffocating creativity in fieldwork. He'd like to see us bring much more diversity and technical ingenuity to every opportunity and maintains this is more a matter of getting ourselves free of dogma than needing more time and money. This has many implications for the way archaeology is designed and procured, moving archaeologists up the professional ladder from builder to architect with contracts based on quality of design, not the price.

Management James Patton Jones,2006-02 This book is a second edition of the author s Bachelor s Degree thesis the re publication of which was prompted by the realization that the original version had been downloaded from the author s website over 700 times in the past ten years The purpose of this second edition is to include new updated information on the described archaeological data management project as well as to provide project status after ten years of use by hundreds of students at Santa Clara University

Exploring Archaeoastronomy Liz Henty,2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyscape is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology s approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy s marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyscape archaeology This volume will examine how all these different variants came about and consider archaeoastronomy s often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today

Archaeology by Design Stephen L. Black,Kevin Jolly,2003-03-19 Archaeology doesn t just happen With large numbers of people involved the complex logistics of fieldwork funding needed for projects of any size and a bewildering set of legal regulations and ethical norms to follow a well run archaeological project requires careful and detailed planning In this reader friendly guide Black and Jolly give novice researchers invaluable

practical advice on the process of designing successful field projects Encompassing both directed academic and directed CRM projects they outline the elements needed in your professional toolkit show step by step how an archaeological project proceeds focus on developing appropriate research questions and theoretical models and address implementation issues from NAGPRA regulations down to estimating the number of shovels to toss into the pickup Sidebars explain important topics like the Section 106 process the importance of ethnology and geology to archaeologists OSHA requirements and how to assess significance Archaeology by Design is an ideal starting point for giving students and novices the big picture of a contemporary archaeological project

Unearthing Forgotten Values Sean P. Connaughton,2025-03-01 About 90 percent of archaeological activity in North America is driven by private sector development In the process archaeology is often used to undermine the interests of those whose material culture it allegedly seeks to preserve and interpret Unearthing Forgotten Values explores the often disrespectful and ultimately unethical nature of commercial archaeology or cultural resource management and proposes a praxis that puts Indigenous communities and their heritage first Based on lengthy experience working with and within Indigenous communities in British Columbia and around the world Sean P Connaughton discusses such thorny issues as the meaning of decolonization Indigenous land rights and sovereignty the commodification of heritage and state support for projects that will exacerbate climate change Weaving together real life stories fieldwork scholarship data introspection and Indigenous values Unearthing Forgotten Values charts a practical course for change Professional archaeology will be the better for it
