Airmobility In Vietnam:

Airmobility in Vietnam John J. Tolson, 1981-01-01 **Vietnam Studies - AIRMOBILITY - 1961-1971** Lieutenant General John J. Tolson, 2014-08-15 Includes 2 charts 12 maps and 41 illustrations Although troops had been dropped by parachute since the early years of the Second World War the use of helicopters to move large number of troops only came to the fore in the years before the Vietnam War During the Vietnam War they would prove their value in allowing the American troops tactical flexibility surprise and most of all mobility that the dense terrain and difficult communications of Vietnam complicated The author of this monograph Lieutenant General John J Tolson has been involved with the airmobile concept since June 1939 when he participated in the first tactical air movement of ground forces by the U S Army Participating in all the combat jumps of the 503d Parachute Infantry Regiment during World War II he became an Army aviator in 1957 and later served as Director of Army Aviation and Commandant of the U S Army Aviation School From April 1967 to July 1968 he served as Commanding General 1st Cavalry Division Airmobile Vietnam As the author himself says in his preface Although Vietnam was the first large combat test of airmobility air assault operations in Southeast Asia would not have been possible without certain key decisions a decade earlier This study attempts to trace the most important milestones which led to the eventual Formation of airmobile divisions It would be impossible in a single volume to adequately describe every airmobile operation in Vietnam during the years 1961 1971 Therefore only selected operations have been chosen as examples of different airmobile tactics Many of these were selected because of the author s personal knowledge Another author might have selected different operations I believe I d be remiss in this account if I were not candid with the reader on some of the pros and cons of airmobility Thus throughout the text I have inserted comments that are intended to broaden the reader s view of this issue Vietnam Studies Ltj John J. Tolson, 2016-09-08 Air assault operations in Southeast Asia would not have been possible without certain key decisions a decade earlier This publication traces the most important milestones which led to the eventual formation of airmobile divisions On 11 December 1961 the United States aircraft carrier USNS Card docked in downtown Saigon with 32 U S Army H 21 helicopters and 400 men The 57th Transportation Company Light Helicopter from Fort Lewis Wash and the 8th Transportation Company Light Helicopter from Fort Bragg N C had arrived in Southeast Asia This event had a two fold significance it was the first major symbol of United States combat power in Vietnam and it was the beginning of a new era of airmobility in the United States Army Just twelve days later these helicopters were committed into the first airmobile combat action in Vietnam Operation CHOPPER Approximately 1 000 Vietnamese paratroopers were airlifted into a suspected Viet Cong headquarters complex about ten miles west of the Vietnamese capitol The paratroopers captured an elusive underground radio transmitter after meeting only slight resistance from a surprised enemy Major George D Hardesty Jr of the 8th Transportation Company and Major Robert J Dillard of the 57th could report that their units had performed outstandingly under their first baptism of fire **Airmobility, 1961-1971** John J. Tolson, 1973 **Airmobility**

1961-1971 Ltg John J. Tolson, 2011-09-26 This is the exciting story of the development of U S airmobile power from theory to practice involving air transport fixed wing aircraft and attack helicopters culminating in Vietnam War operations It includes analysis of airmobile combat operations doctrinal and interservice disputes equipment descriptions and the organization of combat and support units It also includes data about airmobility in South Vietnam s army and it features personal reflections of the author who was at the center of airmobility development and who commanded large airmobile units John J Tolson in June 1939 participated in the first tactical air movement of ground forces by the U S Army He was in all combat jumps of the 503d Parachute Infantry Regiment during World War II became an Army aviator in 1957 and served as Director of Army Aviation and Commandant of the Army Aviation School From April 1967 to July 1968 he commanded the 1st Cavalry Division Airmobile Vietnam Includes many maps and photographs **Vietnam Studies - Airmobility 1961-1971** John J.

Tolson, 1999-12-01 The purpose of this study is to trace the evolution of airmobility in the U S Army The integration of aircraft into the organic structure of the ground forces is as radical a change as the move from the horse to the truck and the process is only beginning Because this change is not the product of one man or one small group of men but rather a fortunate confluence of technology tactics and imagination proper credit to every responsible individual is impossible I have tried to identify some of those people who made a major contribution throughout the years I apologize to those people whose names have been omitted either because of oversight or lack of space Although Vietnam was the first large combat test of airmobility air assault operations in Southeast Asia would not have been possible without certain key decisions a decade earlier This study attempts to trace the most important milestones which led to the eventual formation of airmobile divisions It would be impossible in a single volume to adequately describe every airmobile operation in Vietnam during the years 1961 1971 Therefore only selected operations have been chosen as examples of different airmobile tactics Many of these were selected because of the author s personal knowledge Another author might have selected different operations I believe I d be remiss in this account if I were not candid with the reader on some of the pros and cons of airmobility Thus throughout the text I have inserted comments that are intended to broaden the reader s view of this issue This study is aimed at a broad audience some of whom may only have a passing familiarity with Army aircraft systems These systems are pictured in an appendix with appropriate data on each Over 300 major source documents were reviewed during the preparation of this study For the serious student we have identified a rich vein that as yet has not been deeply mined Thousands of important stories yet untold lay buried in these pages Length has permitted us to extract only a few **Vietnam** John Prados, 2009 The first major synthesis of the war since 2001 drawing upon a host of newly declassified documents presidential tapes and overlooked foreign sources to give the most comprehensive look to date of the war that still haunts America **Airmobile** Jim Mesko, 1984 **The History of North American Small Gas Turbine Aircraft Engines** Richard A. Leyes, William A. Fleming, 1999 This landmark joint publication between the National Air and Space Museum and the American Institute of

Aeronautics and Astronautics chronicles the evolution of the small gas turbine engine through its comprehensive study of a major aerospace industry Drawing on in depth interviews with pioneers current project engineers and company managers engineering papers published by the manufacturers and the tremendous document and artifact collections at the National Air and Space Museum the book captures and memorializes small engine development from its earliest stage Leyes and Fleming leap back nearly 50 years for a first look at small gas turbine engine development and the seven major corporations that dared to produce market and distribute the products that contributed to major improvements and uses of a wide spectrum of aircraft In non technical language the book illustrates the broad reaching influence of small turbines from commercial and executive aircraft to helicopters and missiles deployed in recent military engagements Detailed corporate histories and photographs paint a clear historical picture of turbine development up to the present See for yourself why *The History of North American Small Gas Turbine Aircraft Engines* is the most definitive reference book in its field The publication of *The History of North American Small Gas Turbine Aircraft Engines* represents an important milestone for the National Air and Space Museum NASM and the American Institute of Aeronautics and Astronautics AIAA For the first time there is an authoritative study of small gas turbine engines arguably one of the most significant spheres of aeronautical technology in the second half o

The United States in the Vietnam War, 1954-1975 Louis A. Peake, 1986 **Vietnam Airmobile Warfare Tactics** Gordon L. Rottman, 2012-10-20 A Vietnam veteran explains the composition capabilities equipment and missions of the US Army and Marine Corps helicopter and airmobile units in the Vietnam war and exactly how they carried out their missions **Vietnam, the War in the Air** Gene Gurney, 1985 A pictorial history of the U S air forces in the Vietnam War Air Force Army Navy and Marines

Vietnam Studies John Tolson, Department of Department of the Army, 2014-12-12 Air assault operations in Southeast Asia would not have been possible without certain key decisions a decade earlier This book traces the most important milestones which led to the eventual formation of airmobile divisions

Encyclopedia of the Vietnam War [3 Volumes] Spencer Tucker, 1998-09-18 The largest and most comprehensive study to date of one of the longest and most divisive conflicts in U S history ABC CLIO presents the largest and most comprehensive study to date of the wars in Vietnam This authoritative three volume masterwork details early U S involvement in Vietnam and brings Vietnamese history to the present with discussions of the Socialist Republic of Vietnam from 1975 through 1997 Students and researchers will find that this comprehensive work includes more coverage of diverse topics and more information on individual Vietnamese and American participants and earlier relevant periods in Vietnamese history than any other encyclopedia of its kind Over 900 A Z entries with extensive cross references after each entry Biographies of key Vietnamese and American participants 200 primary source documents 150 illustrations and 22 maps **Airmobility, 1961-1971** John J. Tolson, 1989 **Air Mobility** Keith A. Hutcheson, 1999 **Vietnam Helicopter Pilots Association** Bill Greenhalgh, Ken Fritz, 2007 **Airmobility for the Army** Billy J. Bowling, 1968 The need for airmobility against an elusive

enemy like the one fighting in Vietnam was evident in the defeat given the Viet Cong in their first encounter with the First Cavalry Division The Airmobile Division has established an enviable record in the two years that it has been operating in Vietnam The flexibility of the airmobile concept has made it possible to counter the plans and attacks of the Viet Cong through early detection and offensive operations throughout his habitat The author evaluates airmobility use in Vietnam

The Guidance and Control of V/STOL Aircraft and Helicopters at Night and in Poor Visibility (including Technical Evaluation Report) ,1975 **Military Justice in Vietnam** William Thomas Allison,2007 A concise look at how military justice during the Vietnam War served the dual purpose of punishing U S soldiers crimes and infractions while also serving the important role of promoting core American values democracy and rule of law to the Vietnamese
