Alaska Highway In World War II:

The Alaska Highway in World War II, 1992 *The Alaska Highway in World War II* Kenneth S. Coates, William R Morrison, 2015-08-10 After the Japanese attack on Pearl Harbor a fear of invasion swept North America particularly the West Coast Immediate steps needed to be taken to defend the Far Northwest With Canada's approval Washington drew up plans for an Alaska Highway to connect Edmonton Alberta with Fairbanks Alaska and a pipeline to connect oil fields in the Northwest Territories with the Pacific Coast Between 1942 and 1946 about 40 000 American military and civilian personnel invaded the Canadian Northwest Where there had been few or no roads a highway more than 1 500 miles long was built in less than a year Navigation facilities were improved and pipelines were laid from Fairbanks to the Pacific Airfields were upgraded and new ones built and a telephone network was constructed The Northwest was totally unprepared for this friendly invasion The Alaska Highway ran through semi wilderness where many inhabitants pursued a nomadic lifestyle and towns and settlements were overwhelmed by the American army of occupation This lively history of an American civil and military engineering milestone draws on interviews with veterans and local residents and research in Canadian and U S archives The participants stories provide humor and insights on the building of this transformational highway [A Different Race](#) Christine and Dennis McClure, 2021-01-01 The United States needed a road to Alaska so they could defend the Aleutians from Japan They sent soldiers to build the Alaska Highway The segregated Black 97th Engineers built the road in Alaska and when their disorganized white officers struggled to make progress the army replaced their commander The new one got the job done but ignored military protocol and discipline so the army worried about undisciplined black soldiers replaced him too And to put the fear of God into the soldiers the army trumped up a mutiny charge against ten of them and sentenced them to long prison terms at hard labor [A Different Race](#) Christine McClure, Dennis McClure, 2021-01-02 The United States needed a road to Alaska so they could defend the Aleutians from Japan They sent soldiers to build the Alaska Highway The segregated Black 97th Engineers built the road in Alaska and when their disorganized white officers struggled to make progress the army replaced their commander The new one got the job done but ignored military protocol and discipline so the army worried about undisciplined black soldiers replaced him too And to put the fear of God into the soldiers the army trumped up a mutiny charge against ten of them and sentenced them to long prison terms at hard labor [The US Military and the Pacific Environment](#) Andrew C. Isenberg, Beth Bailey, Paul Landsberg, 2025-07-08 Oceans and deserts jungles and plains mountains and rivers monsoons and blizzards fertile grounds and diseased lands all have shaped how strategy and technology have been deployed and developed and all have supported unexpected victories and decimated even the best laid plans Conversely warfare and militarization have shaped the environment by scarring landscapes accelerating the global spread of disease unbalancing ecosystems and contributing to climate change Reflecting on the inextricable reciprocal and often surprising relationship between the natural world and human warfare these essays offer a new perspective on power

knowledge and the environment in US military history The history of US military engagement in the Pacific powerfully demonstrates the profound and diverse impacts that regions extraordinarily diverse environments have wrought on warfare US military action has also had profound impacts in the Pacific from the nuclear weapons testing programs of the Cold War to the use of chemical defoliants in Vietnam The contributors to this volume consider how the physical environments of the Pacific shaped the process and outcome of battles and wars and discuss the effect warfare and other military actions had on these physical environments

Alaska's Place in the West Roxanne Willis, 2010 The first comprehensive examination of Alaskan development schemes from 1890 to the present Focuses on five major conflicts between environmentalists and developers from reindeer herding to the Trans Alaska Pipeline Takes readers behind common and simplistic representations of the state to explore the rich history and extreme diversity of a land that cannot easily be pigeonholed into typical American conceptions about place
