

## ALCOHOLISM AND HOMOSEXUALITY: A THEORETICAL PERSPECTIVE

Peter M. Nardi, PhD

**ABSTRACT.** Although causal relationships between homosexuality and alcoholism have not been established, the myths and assumptions surrounding this issue are numerous. Much of the available literature on the subject is from a psychoanalytic perspective, emphasizing latent homosexuality as a cause of alcoholism. Very little is from the perspective of gay and lesbian populations. This paper analyzes the assumptions underlying the biological and genetic approaches, learning theory, psychoanalytic perspectives, and sociological models as they relate to alcoholism and homosexuality.

Despite some indication of a high estimated rate of alcoholism among homosexuals (Fifield, 1975; Lohrenz, Connelly, Coyne, & Spare, 1978; Saghir & Robins, 1973), relatively little research focuses directly on the subject. This is due in part to the difficulty in delineating a representative sample of homosexual alcoholics. Alcoholism is difficult enough to define, and finding a cross-section of homosexuals (both open gays as well as those still repressed) is unrealistic. It is also due in part to the traditional resistance in social science to studying homosexuality. In either event, the available material is severely limited and of questionable reliability as the following analysis reveals.

The *Journal of Studies on Alcohol* is one of the most important publications in the alcohol field, publishing original articles and abstracts of current alcohol literature. The *Journal's* index serves as an important resource for the field of alcohol studies, with thousands of citations each year. From 1951 through 1980, however, there were only 42 references under the heading of homosexuality.<sup>1</sup>

---

Dr. Nardi is Associate Professor of Sociology at Peter College, Claremont, California. The author wishes to thank Barry Adam, Andrew Berner, Stephen Murray, Farrell Webb, and Thomas Ziebold for their comments and suggestions.

<sup>1</sup>Abstracting has not always been as systematic or comprehensive as in recent years. There is, however, no indication that references to homosexuality have been systematically omitted. If errors exist, they probably are randomly distributed throughout the years and across various subtopics. Thus, the numbers in Table 1 should be regarded as not absolute but rather as suggestive of the relative proportion of articles on the subject.
