addiction treatment in which the therapist assembles a support network of family members and friends to meet with the patient and therapist at regular intervals The bonds of social cohesion in the network aid the patient in overcoming denial achieving abstinence and avoiding relapse The network approach thereby provides a remarkably effective vehicle for bringing substance abusers into treatment and helping them achieve recovery This is also the first approach to the treatment of substance abuse that integrates individual psychotherapy with support from family and friends It employs contemporary approaches like relapse prevention and helps introduce patients to Alcoholics Anonymous Dr Galanter defines how treatment is implemented and then illustrates his technique with many case studies He provides a full explanation of what addiction is from both a psychological and a pharmacological perspective The book demonstrates that addicted people can be treated effectively with this combination of individual therapy self help and peer support BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
