problem solving and investigative work to develop children's ability to use and apply maths. The textbooks help promote children's recording skills using a variety of motivating contexts and include activities to give further practice in applying maths. The format of the workbooks free children to concentrate on the maths rather than on the presentation of their work and each one contains a record keeping grid to show work completed. The reinforcement sheets are for use selectively with those children who need extra practice of key maths topics in addition to that provided in the textbooks and workbooks. Each sheet is clearly referenced to a workbook or textbook page for easier integration with the core work and clear flagging in the textbooks and workbooks shows which topics are supported by a reinforcement sheet. All the extra work is at the same mathematical level as the core. The extension textbook provides additional work at every stage to consolidate and extend learning. Some of the work extends the range of a topic for all children and some is specifically to stretch the more able. Some of the activities relate to topics in the textbooks and workbooks and the remaining ones can be attempted at any time. The assessment and resources packs contain games and activities to enrich learning. These include photocopiable problem solving activities and calculator work and ideas for practical theme based work covering a range of maths topics. This is the textbook
