Ethics for the Coming Storm Laurie Zoloth, 2023 How can we come to understand our existence on this earth surrounded by air and light and water while living in a place we deliberately and carelessly abuse where resources are becoming scarce and where the well being and basic health of our neighbors is threatened In *Ethics for the Coming Storm* Laurie Zoloth argues that our debates about environmental issues have largely been driven by the language of economics and political power and have become both deeply divisive and symbolic turning our differing truth claims and moral appeals into signs of identity This discourse has utterly failed to change the human behavior or political and economic structures necessary to face global warming head on So Zoloth turns to another language found in the texts and traditions of Jewish thought the language of Scripture the Talmud and philosophy of Judaism which she contends offers a different kind of argument for such a change In fact Zoloth claims the traditions histories and texts of Jewish thought address precisely the sort of existential crisis that we now face and thus deepen and enrich our public discourse about what to do and who to be This book uses a careful attention to rabbinic and philosophical sources in Jewish thought to provide a novel framework through which we can reassess the

choices we make that affect our climate our environment and our social structures

The Coming Storm Bob Reiss, 2021-07-26 The prescient book that first linked specific weather disasters with man made global warming now in its second edition The most readable and intelligent summary of global warming science and politics I have read a valiant effort to make people actually care about global warming Bill McKibben New York Observer What Bob Reiss did to elevate our awareness of the destruction of the rain forest in *The Road to Extrema* he has now done for global warming Reiss bypasses political rhetoric and engages us in storytelling showing us how the greenhouse effect is changing our lives person by person community by community nation by nation Terry Tempest Williams author of *Leap and Refuge* and winner of the John Muir Award and the Robert Marshall Award From massive waves in the Maldives to tornadoes over Tennessee from the halls of Congress to the hard disks of scientists Bob Reiss has taken climate change and made it personal *The Coming Storm* is the layman's guide to global warming fair urgent and deeply unsettling Ted Conover winner of the National Book Critics Circle Award for *Newjack* With a storyteller's gifts Bob Reiss shows how a series of freakish and colossally destructive weather events awakened scientists politicians and ordinary people to the momentous stakes of a changing climate a compelling narrative of the people and events that have shaped this ever more urgent debate Eugene Linden author of *The Future in Plain Sight* and *The Parrot's Lament* Free of unnecessary scientific jargon and filled with the human and political dimensions of this story this book reads like a mystery novel where you already know the terrifying outcome Adding a new preface by the author this edition brings back to life the compelling account of the link between climate and weather disasters
