Commerce Of Cartography:

The Commerce of Cartography Mary Sponberg Pedley, 2022-06-30 Though the political and intellectual history of mapmaking in the eighteenth century is well established the details of its commercial revolution have until now been widely scattered In *The Commerce of Cartography* Mary Pedley presents a vivid picture of the costs and profits of the mapmaking industry in England and France and reveals how the economics of map trade affected the content and appearance of the maps themselves Conceptualizing the relationship between economics and cartography Pedley traces the process of mapmaking from compilation production and marketing to consumption reception and criticism In detailing the rise of commercial cartography Pedley explores qualitative issues of mapmaking as well Why for instance did eighteenth century ideals of aesthetics override the modern values of accuracy and detail And what to an eighteenth century mind and eye qualified as a good map A thorough and engaging study of the business of cartography during the Enlightenment *The Commerce of Cartography* charts a new cartographic landscape and will prove invaluable to scholars of economic history historical geography and the history of publishing

The Cartography of Commerce Alistair Simon Maeer, 2006 Analysis of the import export statistics of seventeenth century England reveals the emergence of a powerful economic engine However while statistics and other sources may imply suggest and sometimes even show us the English economic awakening of the seventeenth century few sources can demonstrate it as vividly as maps and artwork Maps can easily throw much light onto social economic and political history Few sources offer the perspective that visual aids do A map which is a graphic expression of perceived reality offers important contemporary insight into the conceptions and conventions of the peoples of the past So too do maps succinctly depict the desires and modalities of peoples Historians can both broaden their base of sources and widen their conceptual horizons by incorporating visual components into their primary source materials Accordingly this dissertation uses cartographic sources to increase our understanding of seventeenth century English overseas expansion By correlating the development of overseas expansion to the advance of marine technologies in the seventeenth century we can see that the growth in the shipping industry cartography and English overseas interests were all interrelated that is all were integral to the nation s economic expansion Specifically by examining English cartographic evidence particularly works by the Thames School alongside documentation of the growth in the English maritime economy it is possible to express graphically the emergent interrelated interests of mapping and trade in England in the seventeenth century By combining the graphic evidence with the textual material I contextualize visualize and help to better explain the interrelatedness of advances in mapping commerce and empire in seventeenth century England and effectively show England s rise to hegemony through the imagery of the day Thus by synthesizing three distinct types of history maritime economic and cartographic we can more fully express and understand as contemporaries did the expansion of the English beyond the Atlantic Ocean

Revolutionary Things Ashli White, 2023-06-20 How objects associated with the American French and

Haitian revolutions drew diverse people throughout the Atlantic world into debates over revolutionary ideals. By excavating the power of material objects and visual images to express the fervor and fear of the revolutionary era, Ashli White brings us closer to more fully embodied, more fully human figures. Richard Rabinowitz, author of *Objects of Love and Regret: A Brooklyn Story*, in this important, innovative book, Ashli White moves nimbly between North America, Europe, and the Caribbean to capture the richness and complexity of material culture in the Age of Revolutions. Michael Kwass, Johns Hopkins University Historian, Ashli White explores the circulation of material culture during the American, French, and Haitian revolutions, arguing that in the late eighteenth century, radical ideals were contested through objects as well as in texts. She considers how revolutionary things, as they moved throughout the Atlantic, brought people into contact with these transformative political movements in visceral, multiple, and provocative ways. Focusing on a range of objects—ceramics and furniture, garments and accessories, prints, maps, and public amusements—White shows how material culture held political meaning for diverse populations. Enslaved and free women and men, poor and elite, all turned to things as a means to realize their varied and sometimes competing visions of revolutionary change.

Mapping and Charting in Early Modern England and France Christine Petto, 2015-03-26. *Mapping and Charting for the Lion and the Lily: Map and Atlas Production in Early Modern England and France* is a comparative study of the production and role of maps, charts, and atlases in early modern England and France, with a particular focus on Paris, the cartographic center of production from the late seventeenth century to the late eighteenth century, and London, which began to emerge in the late eighteenth century to eclipse the once-favored Bourbon center. The themes that carry through the work address the role of government in map and chart making. In France, in particular, it is the importance of the centralized government and its support for geographic works and their makers through a broad and deep institutional infrastructure. Prior to the late eighteenth century in England, there was no central controlling agency or institution for map, chart, or atlas production, and any official power was imposed through the market rather than through the establishment of institutions. There was no centralized support for the cartographic enterprise, and any effort by the crown was often challenged by the power of Parliament, which saw little value in fostering or supporting scholar-geographers or a national survey. This book begins with an investigation of the imagery of power on map and atlas frontispieces from the late sixteenth century to the seventeenth century. In the succeeding chapters, the focus moves from county and regional mapping efforts in England and France to the paper wars over encroachment in their respective colonial interests. The final study looks at charting efforts and highlights the role of government support and the commercial trade in the development of maritime charts, not only for the home waters of the English Channel but the distant and dangerous seas of the East Indies.

as socially constructed texts provide a rich source for historians and historians of science investigating patronage the governmental initiatives and support for science and the governmental involvement in early modern commerce Over the course of nearly two centuries 1594 1789 in adopting and adapting maps as tools of statecraft the Bourbon Dynasty both developed patron client relations with mapmakers and corporations and created scientific institutions with fundamental geographical goals Concurrently France particularly Paris emerged as the dominant center of map production Individual producers tapped the traditional avenues of patronage touted the authority of science in their works and sought both protection and legitimation for their commercial endeavors within the printing industry Under the reign of the Sun King these producers of geographical works enjoyed preeminence in the sphere of cartography and employed the familiar rhetoric of image to glorify the reign of Louis XIV Later as scientists and scholars embraced Enlightenment empiricism geographical works adopted the rhetoric of scientific authority and championed the concept that rational thought would lead to progress When France Was King of Cartography investigates over a thousand maps and nearly two dozen map producers analyzes the map as a cultural artifact map producers as a group and the array of map viewers over the course of two centuries in France The book focuses on situated knowledge or localized interests reflected in these geographical productions Through the lens of mapmaking When France Was King of Cartography examines the relationship between power and the practice of patronage geography and commerce in early modern France

Edges of Transatlantic Commerce in the Long Eighteenth Century Seohyon Jung, Leah M. Thomas, 2021-05-03 Edges of Transatlantic Commerce in the Long Eighteenth Century examines and challenges the boundaries of the Atlantic in the eighteenth century with a particular focus on commerce Commerce as a keyword encompasses a wide range of documented and undocumented encounters that invoke topics such as shared or conflicting ideas of value affective experiences of the emerging global system and development of national economies as well as their opponents By investigating what gets exchanged created or obscured on the peripheries of transatlantic commercial relations and geography in the eighteenth century the chapters in this collection reimagine the edge as a liminal space with a potential for an alternative historical and aesthetic knowledge To ground this inquiry in a more material dimension the chapters engage specifically with what is being exchanged sold or communicated across the Atlantic by exploring ideas that are being shaped concealed undermined or exploited through intricate exchanges With its contributions from multiple contexts and disciplinary perspectives Edges of Transatlantic Commerce offers insights into relatively neglected aspects of the transatlantic world to cultivate the value that the edges allow us to conceive

Explorers of the Maritime Pacific Northwest William L. Lang Ph.D., James V. Walker, 2016-05-09 Covering the adventures of coastal and ocean explorers who made key discoveries and landmark observations from northern California up the coastline to Alaska during the mid 1700s to the early 1800s this anthology of primary source journal entries book excerpts maps and drawings enables readers to discover the Northwest Coast for themselves More than 200 years ago

explorers traveled from Central America Russia and even Europe to explore the coastline of the American Pacific Northwest with goals of developing new trade routes claiming territory for their home countries expanding their fur trade or exploring in the name of scientific discovery This book will take readers to the decks of the great ships and along for the adventures of legendary explorers such as James Cook Alejandro Malaspina and George Vancouver This book collects primary source materials such as journal entries book excerpts maps and drawings that document how explorers first experienced the unknown Pacific Northwest coast as seen through the eyes of non native people Readers will learn how explorers such as Vitus Bering and Robert Gray used the full extent of their powers of observation to record the landscape animals and plants they witnessed as well as their interactions with indigenous peoples during their search for the mythic Northwest Passage The book also explains how the maritime explorers of this period mapped the remote regions of the Northwest Coast working without the benefit of modern technology and relying instead on their knowledge of a range of sciences mathematics and seamanship in addition to their ability to endure harsh and dangerous conditions to produce exceptionally detailed maps
