Common Knowledge Development Of Understanding In The Classroom:

Common Knowledge Derek Edwards, Neil Mercer, 2013-12-17 This book is about education as a communicative process about how knowledge is presented received controlled understood and misunderstood by teachers and children in the classroom

Common Knowledge ; the Development of Understanding in the Classroom, By Derek Edwards and Neil Mercer Derek Edwards, 1987

Language and the Joint Creation of Knowledge Neil Mercer, 2019-04-25 In the World Library of Educationalists series international experts themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field

Language and the Joint Creation of Knowledge draws on the most prominent writing of Neil Mercer covering his ground breaking and critically acclaimed work on the role of talk in education and on the relationship between spoken language and cognition The text explores key themes relating theoretical ideas to research evidence and to practical educational situations that improve children s lives Offering students and researchers a clear accessible and up to date account of a sociocultural perspective on the relationship between spoken language and cognition it explains one of the key themes in Neil Mercer s work that humans have uniquely evolved the capacity to think together or interthink Offering a crucial insight into the work of Neil Mercer this selection showcases why his approach has become the dominant paradigm in educational research and why it is increasingly influential in the psychology of teaching and learning This unique collection of published articles and chapters which represent the key themes and range of his research over the last 40 years will be of interest to all followers of his work and any reader interested in the role of language in education

Doing Educational Research Geoffrey Walford, 2002-11 Thirteen major educationalists offer semi autobiographical accounts of their own influential research work focusing on the practical and personal realities of the research process Authors such as Barbara Tizard and Martin Hughes Stephen J Ball David Reynolds and Peter Mortimore discuss their approaches to aspects of research from conception and funding of the project to information gathering and analysis writing up and publishing

Child Perspectives and Children's Perspectives in Theory and Practice Dion Sommer, Ingrid Pramling Samuelsson, Karsten Hundeide, 2009-12-24 Recent decades have seen a growing emphasis in a number of professional contexts on acknowledging and acting on the views of children This trend was given added weight by the UN Convention on the Rights of the Child ratified in 1990 Today seeking the perspective of the child has become an essential process in all sorts of tasks from framing new legislation to regulating professions This book answers the fundamental question of what it is that constitutes a child perspective and how this might differ from the perspectives of children themselves The answers to such questions have important implications for building progressive and developmental adult child relationships However theoretical and empirical treatments of child perspectives and children s perspectives are

very diverse and idiosyncratic and the standard reference work has yet to be written Thus this work is an attempt to fill the gap in the literature by searching for and defining key formulations of potential child perspectives within parts of the so called new child paradigm This has been derived from childhood sociology contextual relational developmental psychology interpretative humanistic psychology and developmental pedagogy The highly experienced authors develop a comprehensive professional child perspective paradigm that integrates recent theory and empirical child research With its clear presentation of underlying theories and suggested applications this book illustrates a child oriented understanding of specific relevance to both child care and preschool educational practice

Hark, Hark! Hear the Story of a Science Educator Jazlin Ebenezer, 2020-06-01 Hark Hark Hear the Story of a Science Educator highlights some compelling ideas on science teaching and learning through the author's journey and includes evolution and revolution in the growth of scientific knowledge The book discusses views of McComas et al and Lederman et al on the nature of science as well as the learning theories of Piaget 1926 Vygotsky 1978 and Marton 1981 The three theories of learning frame methods in teaching science The author is well known in the science education research community for her groundbreaking work in student conceptions and conceptual change particularly as related to phenomenography Key Features Helps science educators explore new avenues related to various innovative curricula teaching and learning Presents abstract learning theories such as social constructivism in personal stories and experiences Bridges the divide between the science education community and the general public on significant ideas of science teaching and learning Uncovers relational conceptual change inquiry learning Discusses current socioscientific community based issues other centeredness through scientific investigation and engineering design challenges
