Come Early Spring:

The Earliest Europeans Robert Hosfield,2020-05-31 The Earliest Europeans explores the early origins of man in Europe through the perspective of a year in the life how hominins in the Lower Palaeolithic coped with the year round practical challenges of mid latitude Europe with its distinctive temperatures seasonality patterns and available resources Current research has provided increasingly robust archaeological and Quaternary Science records but there are ongoing uncertainties as to both the earliest Europeans specific survival strategies and behaviours and the character of their dispersals into Europe In short how sustained and successful were the individual phases of European occupation by Lower Palaeolithic hominins and what sorts of human were they Using a season by season chapter structure to explore for example the contrasting demands and opportunities of winter versus summer survival Hosfield explores how foods and other resources would vary across the four seasons in quantity and quality and the resulting implications for hominin behaviours Text boxes provide the background on key issues and the book draws on a range of supporting evidence including technology e g the nature of Lower Palaeolithic stone tools the evidence for organic tools hominin life history e g the length of infant dependency the nature of parenting the implications of different mating models the Social Brain Hypothesis cognitive studies e g brain scanning research into possible planning capabilities and potential bias in the archaeological record e g in terms of what is and isn't preserved By testing the likelihood of different scenarios by comparing short term site based insights with long term regional trends Hosfield is able to put forward ideas on how our earliest European ancestors survived and what their lives were like
