**Comet Lore** Edwin Emerson, 2022-01-17 In *Comet Lore* Edwin Emerson embarks on a compelling exploration of humanity's fascination with comets throughout history. The book intricately weaves scientific inquiry and folklore delving into the myriad interpretations and cultural significances attributed to these celestial phenomena. Emerson's meticulous research, characterized by a narrative style that balances erudition with accessibility, places comets within a broader literary and scientific context while offering a captivating blend of myth and observation that reflects the evolving relationship between humanity and the cosmos. Edwin Emerson, a noted journalist and historian, possessed a fervent curiosity about natural phenomena and their impact on societal beliefs. Drawing from his extensive travels and keen interest in both science and folklore, Emerson penned *Comet Lore* to bridge the gap between empirical observation and the poetic imagination. His background in journalism afforded him the skills necessary to narrate and interpret complex ideas with clarity, making this work a unique contribution to both literary and scientific discussions on celestial events. Highly recommended for readers intrigued by the intersection of science and culture, *Comet Lore* offers a profound reflection on how comets have shaped human thought throughout history. It provided a worldwide science community with a wealth of exciting new discoveries, the most remarkable of which was undoubtedly the first image of a cometary nucleus. Halley's Comet is the brightest periodic comet and the most famous of the 750 known comets. With its 76-year period, its recent appearance was truly a once-in-a-lifetime

observational opportunity The 1985 86 apparition was the thirtieth consecutive recorded apparition Five apparitions ago the English astronomer Edmond Halley discovered the periodicity of his comet and correctly predicted its return in 1758 a triumph for science best appreciated in the context of contemporary views or rather fears about comets at that time The increasingly rapid progress in technological development is very much apparent when one compares the dominant tools for cometary research during Halley s next three apparitions in 1835 studies were made based on drawings of the comet in 1910 photographic plates were used while in March 1986 an armada of six spacecraft from four space agencies approached the comet and carried out in situ measurements 1 AU from the Earth In 1910 nobody could have dreamed that this was possible and today it is equally difficult to anticipate what scientists will be able to achieve in 2061
