Comfort of the Fields : the Best-known Poems Archibald Lampman,1979 **The Poems of Archibald Lampman**

Archibald Lampman,1900 Adaptive Thermal Comfort: Principles and Practice Fergus Nicol,2012-03-15 The fundamental function of buildings is to provide safe and healthy shelter For the fortunate they also provide comfort and delight In the twentieth century comfort became a product produced by machines and run on cheap energy In a world where fossil fuels are becoming ever scarcer and more expensive and the climate more extreme the challenge of designing comfortable buildings today requires a new approach This timely book is the first in a trilogy from leaders in the field which will provide just that It explains in a clear and comprehensible manner how we stay comfortable by using our bodies minds buildings and their systems to adapt to indoor and outdoor conditions which change with the weather and the climate The book is in two sections The first introduces the principles on which the theory of adaptive thermal comfort is based The second explains how to use field studies to measure thermal comfort in practice and to analyze the data gathered Architects have gradually passed responsibility for building performance to service engineers who are largely trained to see comfort as the product designed using simplistic comfort models The result has contributed to a shift to buildings that use ever more energy A growing international consensus now calls for low energy buildings This means designers must first produce robust passive structures that provide occupants with many opportunities to make changes to suit their environmental needs Ventilation using free natural energy should be preferred and mechanical conditioning only used when the climate demands it This book outlines the theory of adaptive thermal comfort that is essential to understand and inform such building designs This book should be required reading for all students teachers and practitioners of architecture building engineering and management for all who have a role in producing and occupying twenty first century adaptive low carbon comfortable buildings

Adaptive Thermal Comfort: Foundations and Analysis Michael Humphreys,Fergus Nicol,Susan Roaf,2015-08-27 There has been widespread dissatisfaction with accepted models for predicting the conditions that people will find thermally comfortable in buildings These models require knowledge about clothing and activity but can give little guidance on how to quantify them in any future situation This has forced designers to make assumptions about people s future behaviour based on very little information and as a result encouraged static design indoor temperatures This book is the second in a three volume set covering all aspects of Adaptive Thermal Comfort The first part narrates the development of the adaptive approach to thermal comfort from its early beginnings in the 1960s It discusses recent work in the field and suggests ways in which it can be developed and modelled Such models can be used to set dynamic interactive standards for thermal comfort which will help overcome the problems inherited from the past The second part of the volume engages with the practical and theoretical problems encountered in field studies and in their statistical analysis providing guidance towards their resolution so that valid conclusions may be drawn from such studies **New Outlook** ,1907 Engineering Systems and Networks

Marlene Amorim, Carlos Ferreira, Milton Vieira Junior, Carlos Prado, 2016-12-18 This book gathers a selection of the best papers presented at the joint international conference ICIEOM CIO IIE 2015 offering recent research on industrial engineering management and operations from an international and interdisciplinary perspective It includes contributions from different fields such as operations research modeling and simulation production and service management and logistics information systems and quality and as such is of interest to both researchers and practitioners Reflecting the interconnected nature of today's production systems characterized by intense flows of goods information and individuals between companies and nations it is a valuable resource for anyone wanting an in depth understanding of the field to guide managerial practice in order to take full advantage of existing opportunities *The Outlook* Lyman Abbott, Hamilton Wright Mabie, Ernest Hamlin Abbott, Francis Rufus Bellamy, 1907 **The Revised Reports** Frederick Pollock, Robert Campbell, Oliver Augustus Saunders, Arthur Beresford Cane, Joseph Gerald Pease, William Bowstead, 1914 Class, 1928 **Thermal Comfort in Hot Dry Climates** Ahmadreza Foruzanmehr, 2017-09-14 With increases in global temperatures the risk of overheating is expected to rise around the world This results in a much higher dependency upon energy intensive cooling systems and air conditioners to provide thermal comfort but how sustainable is this in a world where problems with the production of electricity are predicted Vernacular houses in hot and dry central Iran have been adapted to the climate through passive cooling techniques and this book provides a valuable assessment of the thermal performance of such housing Shedding new light on the ability of traditional housing forms to provide thermal comfort Thermal Comfort in Hot Dry Climates identifies the main cooling systems and methods in traditional houses in central Iran and examines how architectural elements such as central courtyards distinct seasonal rooms loggias basements and wind catchers can contribute to the provision of thermal comfort in vernacular houses **Architecture & Sustainable Development (vol.1)** Magali Bodart, Arnaud Evrard, 2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries **Journal of the Assembly of the State of New York** New York (State).
