**Media Portrayals of Religion and the Secular Sacred** Kim Knott, Elizabeth Poole, 2016-04-29 Is it true that Christianity is being marginalised by the secular media at the expense of Islam Are the mass media Islamophobic Is atheism on the rise in media coverage Media Portrayals of Religion and the Secular Sacred explores such questions and argues that television and newspapers remain key sources of popular information about religion They are particularly significant at a time when religious participation in Europe is declining yet the public visibility and influence of religions seems to be increasing Based on analysis of mainstream media the book is set in the context of wider debates about the sociology of religion and media representation The authors draw on research conducted in the 1980s and 2008-10 to examine British media coverage and representation of religion and contemporary secular values and to consider what has changed in the last 25 years Exploring the portrayal of Christianity and public life Islam and religious diversity atheism and secularism and popular beliefs and practices several media events are also examined in detail the Papal visit to the UK in 2010 and the ban of the controversial Dutch MP Geert Wilders in 2009 Religion is shown to be deeply embedded in the language and images of the press and television and present in all types of coverage from news and documentaries to entertainment sports reporting and advertising A final chapter engages with global debates about religion and media

**The Religions of Ancient Israel** Ziony Zevit, 2003-06-01 This is the most far reaching interdisciplinary investigation into the religion of ancient Israel ever attempted The author draws on textual readings archaeological and historical data and epigraphy to determine what is known about the Israelite religions during the Iron Age 1200-586 BCE The evidence is synthesized within the structure of an Israelite worldview and ethos involving kin tribes land traditional ways and places of worship and a national deity Professor Zevit has originated this interpretive matrix through insights ideas and models developed in the academic study of religion and history within the context of the humanities He is strikingly original for instance in his contention that much of the Psalter was composed in praise of deities other than Yahweh Through his book the author has set a precedent which should encourage dialogue and cooperative study between all ancient historians and archaeologists but particularly between Iron Age archaeologists and biblical scholars The work challenges many conclusions of previous scholarship about the nature of the Israelites religion

**Religion, Politics and Law in the European Union** Lucian N. Leustean, John T.S. Madeley, 2013-09-13 EU enlargement to countries in Central and Eastern Europe in 2004 the inclusion of Bulgaria and Romania in 2007 and increasing debates on Turkey's membership has dramatically transformed the European Union into a multi religious space Religious communities are not only shaping identities but are also influential factors in political discourse This edited volume examines the activities of religious actors in the context of supranational European institutions and the ways in which they have responded to the idea of Europe at local and international levels By bringing together scholars working in political science history law and sociology this volume analyses key religious factors in contemporary EU

architecture such as the transformation of religious identities the role of political and religious leaders EU legislation on religion and the activities of religious lobbies This book was published as a special issue of Religion State and Society

**Media Perceptions of Religious Changes in Australia** Enqi Weng,2019-12-05 This volume explores the contradiction between the news coverage given to issues of religion particularly since 2001 in relation to issues such as terrorism politics security and gender and the fact of its apparent decline according to Census data Based on media research in Australia and offering comparisons with the UK the author demonstrates that media discussions overlook the diversity that exists within religions particularly the country's main religion Christianity and presents religion according to specific interpretations shaped by race class and gender which in turn result in very limited understandings of religion itself Drawing on understandings of the sacred as a non negotiable value present in religious and secular form Media Perceptions of Religious Changes in Australia calls for a broader sociological perspective on religion and will appeal to scholars of sociology and media studies with interests in religion and public life

**Nanzan Guide to Japanese Religions** Paul L.
