Dresden Fred Taylor,2004 At 9 51pm on Tuesday 13 February 1945 Dresden s air raid sirens sounded as they had done many times in the previous five years until then most always a false alarm No searchlights probed the skies above the unprotected target city the guns had mostly been moved East to counter the Russian advance By the next morning 796 RAF Lancasters and 311 USAAF Flying Fortresses had dropped more than 4 500 tons of high explosives and incendiary devices More than 25 000 inhabitants perished in the terrifying firestorm and thirteen square miles of the city s historic centre including incalculable quantities of treasure and works of art lay in ruins It was Ash Wednesday 1945 This is the first serious re appraisal of an event that lives in the popular memory with Guernica and Hiroshima as a by word for the horror of twentieth century air warfare Drawing on archives and primary sources only accessible since the fall of the East German regime together with British and American records Frederick Taylor has also talked to Allied aircrew and the city s survivors whether Jews working as slave labourers members of the German armed services refugees or ordinary citizens of Dresden

Dresden Frederick Taylor,2005-01-18 For decades it has been assumed that the Allied bombing of Dresden a cultured city famous for its china chocolate and fine watches was militarily unjustifiable an act of retribution for Germany s ceaseless bombing of London and other parts of England Now Frederick Taylor s groundbreaking research offers a completely new examination of the facts and reveals that Dresden was a highly militarized city actively involved in the production of military armaments and communications Incorporating first hand accounts contemporaneous press material and memoirs and never before seen government records Taylor proves unequivocally the very real military threat Dresden posed and how a legacy of propaganda shrouded the truth for sixty years

verifiably banned for all nations through an international treaty or definitively choose a policy of unilateral space dominance that may lead to an arms race in space and possibly to another cold war Through a careful discussion of the history of space programs their impact on past policies and events the tactical and strategic influence of space weapons on the engagement of war and the potential pitfalls of a dominance strategy this book concludes that unilateral military dominance of space by the United States would be a supreme mistake and that it would make Americans less secure
