Drug-drug Interaction Alerts and Provider Response Braden Lynch,2012 Drug Drug Interactions DDIs and their identification presentation and resolution within an Electronic Medical Record EMR system creates significant challenges for protecting patients The issue of alert fatigue can result in ignoring or overriding DDI alerts This research characterized DDIs user response and clinically relevant DDIs were further evaluated for patient harm The initial count of medication warnings generated in the EMR system during a three 3 month period was 99 638 with 10 299 unique DDI alerts Over a third 34% of the DDI alerts were overridden Next based on preponderance risk or severity a subset of five 5 drug interaction pairs were investigated for patient harm These DDI pairs included heparin with low molecular weight LMW heparin ketorolac with non steroidal anti inflammatory drugs ritonavir with fluticasone simvastatin with gemfibrozil and nitrates with phosphodiesterase inhibitors Surrogate markers for patient harm did not show negative outcomes with these contraindicated DDI pairs

Medinfo 2004 Marius Fieschi,Enrico Coiera,Yu-Chan Jack Li,2004 A fundamental challenge for medical informatics is to develop and apply better ways of understanding how information technologies and methods can help support the best care for every patient every day given available medical knowledge and resources In order to provide the most effective healthcare possible the activities of teams of health professionals have to be coordinated through well designed processes centered on the needs of patients For information systems to be accepted and used in such an environment they must balance standardization based on shared medical knowledge with the flexibility required for customization to the individual patient Developing innovative approaches to design and build evidence based careflow management systems is essential for providing the knowledge management infrastructure of health care organizations that seeks to increase performance in delivering high quality care services by efficiently exploiting available resources Parallel challenges arise in the organization of research at the biological and clinical levels where the focus on systematically organizing and supporting processes of scientific inquiry by novel informatics

methods and databases are in their very early stages These Proceedings of Medinfo 2004 demonstrate the base of knowledge medical informatics professionals will collectively draw upon in the years ahead to meet these challenges and realize opportunities
