### **Strengthening the resiliency of dryland forest-based livelihoods in Ethiopia and South Sudan** Steven

Lawry, Rebecca McLain, Habtemariam Kassa, 2015-08-20 This literature review explores how political economic and resource management policies and programs can reduce forest degradation and increase the contribution of forest goods and services to sustainable livelihood strategies In Ethiopia studies indicate that forest dependency is strong throughout the country but the importance of forest income varies across different regions and wealth categories Research suggests that improving forest product market governance is key to strengthening forest livelihood resiliency Recent experiments with forest governance devolution have shown mixed results in terms of improving forest conditions and livelihoods Smallholder land certification has met with considerable success whereas participatory forest management schemes have positive ecological outcomes but fall short in terms of livelihood gains In South Sudan civil war has limited the depth and scope of research on dryland forests and livelihoods Food security analyses indicate that the importance of forest income varies by region and season Markets are poorly developed and forest governance systems are weak in many parts of the country Key threats to forest livelihoods in both countries include shifting climatic conditions large scale population movements large scale land acquisitions and weakened governance institutions and in South Sudan continuing violent conflict In Ethiopia research and policy reform should focus on the relationship between forest rights devolution livelihoods forest management practices and forest conditions as well as on the impacts of demographic change on forest based livelihoods forest management and forest cover In South Sudan research should focus on documenting the impacts of conflict on forest based livelihoods with an view to structuring humanitarian aid programs in ways that mitigate the negative impacts

*World Forests, Society and Environment* Matti Palo, J. Uusivuori, 2012-12-06 This book addresses current global and regional issues concerning the world s forests societies and the environment from an independent and non governmental point of view A main message is that cooperation on a global scale is not only commendable but essential if solutions to the problems facing the world s forests are to be found To achieve this modern science needs to find a clearer picture of relationships between forests human activity and the environment and of the consequences of environmental change for the ability of societies to survive Part I Editorial Perspectives is analyzing the ongoing globalization processes of forests societies and the environment Part II Society and Environment reviews worldwide trends with significance for the future of forests and forestry While the trends are influenced by forest sector issues that sector is influenced to a much larger extent by external factors such as demography urbanization

or technological development Part III Importance of Forests looks at the value of the goods and services of forests tangible and intangible market and non market and concludes that failure to recognize their full value is one of the crucial impediments to sustainable development In Part IV Global Forum scientists take up global forestry themes deforestation trade and the environment climate change biodiversity with the aim of stimulating wider discussion Part V Regional Forum looks at major themes of particular relevance to Africa Asia Pacific Latin America North America and Europe such as farm and agroforestry corruption and concessions urban forestry and environmental conflicts Part VI introduces the special theme forest sectors in transition economies Teams of scientists from Russia and China focus on the implications of the transition from plan to market economy illuminating both the very different nature of the forest sector in the two countries and the different transition paths that they have adopted In the past millennium the entire world has been discovered In the past half century the contribution of forests to the economy worldwide has been perceived while only recently have their societal and environmental benefits been globally recognized Globalization is a demanding process requiring knowledge and information This book offers knowledge facts and information but also values from diverse human and cultural perspectives about world forests society and environment to help us towards equity in our use of the global forest to create a clearer vision on a unasylna Proceedings RMRS, 1998 Forests And Forest Plants - Volume II John N.
