Dry Roots:

Root Methods A.L. Smit, A.G. Bengough, C. Engels, M. van Noordwijk, S. Pellerin, S.C. van de Geijn, 2000-07-26 A comprehensive review of all modern methods for plant root research both in the field and in the laboratory. It covers the effects of environmental interactions with root growth and function, focussing in particular on the assessment of root distribution and dynamics. It also describes and discusses the processing of root observations, analysis and modelling of root growth and architecture, root image analysis, computer assisted tomography and magnetic resonance imaging. Furthermore, a survey of the application of isotope techniques in root physiology is given.

A Weaver's Garden Rita Buchanan, 1999-01-01 Valuable hints from a veteran botanist and weaver on dyeing fibers and fabrics, what soap plants to use for cleaning textiles, advice on fragrant plants to scent and protect fabrics, plant materials to use as tools, suggestions for planning and creating a garden featuring cotton, flax, indigo and much more. Includes an abundance of illustrations.

Root Genomics and Soil Interactions Martin Crespi, 2012-12-26 Fully integrated and comprehensive in its coverage. *Root Genomics and Soil Interactions* examines the use of genome based technologies to understand root development and adaptability to biotic and abiotic stresses and changes in the soil environment. Written by an international team of experts in the field, this timely review highlights both model organisms and important agronomic crops. Coverage includes novel areas unveiled by genomics research: basic root biology and genomic approaches applied to analysis of root responses to the soil environment. Each chapter provides a succinct yet thorough review of research.

Special Crops, 1918 **Physiology and Breeding of Cereals** Gustavo A. Slafer, Iker Aranjuelo, Roxana Savin, Ignacio Romagosa, 2025-02-14 This Research Topic has been developed in the context of the V Symposium on Physiology and Breeding of Cereals being held in Lleida, Catalonia, Spain on 8-9 May 2023. The series of Symposia on Physiology and Breeding of Cereals has been aiming to create a fertile space for scientific exchange and to facilitate synergies between scientific groups working on issues relating to the physiology, genetics and breeding of cereals. These Symposia were initially organized within the context of the research network on Physiology of Yield and Quality for the Improvement of Cereals and continue to be organized by research groups that were part of the network together with others that join this activity. We expect to attract submissions of works presented in the symposium as well as others by non attendees. Food security is threatened due to population growth, increased individual demands and alternative uses for crops including their use as biofuels. In addition, over the next few decades, climate change will affect the quantity and quality of field crops through the compound effects of elevated atmospheric CO₂ as well as changing
