## **Becoming Human:**

**Becoming Human** Zakiyyah Iman Jackson, 2020-05-19 Winner 2021 Gloria E Anzald a Book Prize given by the National Women s Studies Association Winner 2021 Harry Levin Prize given by the American Comparative Literature Association Winner 2021 Lambda Literary Award in LGBTQ Studies Argues that Blackness disrupts our essential ideas of race gender and ultimately the human Rewriting the pernicious enduring relationship between Blackness and animality in the history of Western science and philosophy *Becoming Human Matter and Meaning in an Antiblack World* breaks open the rancorous debate between Black critical theory and posthumanism Through the cultural terrain of literature by Toni Morrison Nalo Hopkinson Audre Lorde and Octavia Butler the art of Wangechi Mutu and Ezrom Legae and the oratory of Frederick Douglass Zakiyyah Iman Jackson both critiques and displaces the racial logic that has dominated scientific thought since the Enlightenment In so doing *Becoming Human* demonstrates that the history of racialized gender and maternity specifically anti Blackness is indispensable to future thought on matter materiality animality and posthumanism Jackson argues that African diasporic cultural production alters the meaning of being human and engages in imaginative practices of world building against a history of the bestialization and thingification of Blackness the process of imagining the Black person as an empty vessel a non being an ontological zero and the violent imposition of colonial myths of racial hierarchy She creatively responds to the animalization of Blackness by generating alternative frameworks of thought and relationality that not only disrupt the racialization of the human animal distinction found in Western science and philosophy but also challenge the epistemic and material terms under which the specter of animal life acquires its authority What emerges is a radically unruly sense of a being knowing feeling existence one that necessarily ruptures the foundations of the human **Being Human** Anna L. Peterson, 2001-05-26 *Being Human* examines the complex connections among conceptions of human nature attitudes toward non human nature and ethics Anna Peterson proposes an ethical anthropology that examines how ideas of nature and humanity are bound together in ways that shape the very foundations of cultures Peterson discusses mainstream Western understandings of what it means to be human as well as alternatives to these perspectives and suggests that the construction of a compelling coherent environmental ethics will revise our ideas not only about nature but also about what it means to be human *The Limit of Responsibility* Esther D. Reed, 2018-08-23 This volume frames the question of responsibility as a problem of agency in relation to the systems and structures of globalization According to Ricoeur responsibility is a shattered concept when considered too narrowly as a problem of act agency and individual freedom To examine this Esther Reed develops a short genealogy of modern liberal and post liberal concepts of responsibility in order to understand better the relationship dominant modern framings of the meanings of responsibility Reed engages with writings by major modern Schleiermacher Hegel Marx Weber and post liberal Buber Levinas Derrida Badiou Butler Young Critchley theorists to illustrate the shift from an ethnic responsibility built on notions of accountability and attributions to an ethic responsibility

that starts variously from the other Reed sees Dietrich Bonhoeffer as the most promising partner of this theological dialogue as his learning of responsibility from the risen Christ present now in the global church is a welcome provocation to new thinking about the meaning of responsibility learned from land distant neighbour global church and the bible Bonhoeffer's reflections on the centre boundaries and limits of responsibility remain helpful to Christian people struggling with an increasingly exhausted concept of accountability

*On Being and Becoming Human* Willard Gaylin, 1991 In an age of robotics artificial intelligence and renewed respect for animals are we still such extraordinary creatures In *On Being and Becoming Human* psychiatrist Willard Gaylin uses two of Western culture's most powerful legends Adam and Eve and Pinocchio to define the fundamental nature of being human

*On Being Human* Ray S. Anderson, 2010-10-01 What does it mean to be human How does a right understanding of personhood affect decisions on critical life situations What implications does a biblical perspective on personhood have for the pastoral ministry of healing and hope In answering these questions Ray S Anderson focused on the person as determined by and sustained by the creative power of God He explored the the implications of a biblical understanding of personhood for such critical issues as human sexuality family relationships abortion and death He broke new ground in relating pastoral care and counseling to contemporary issues which challenge Christians and their understanding of the meaning of human life

**Hope for the Oppressor** Patrick Oden, 2019-07-26 The liberating work of God calls the oppressed out of oppression and the oppressor out of oppressing The challenge in seeking a thorough liberation of oppressors is to help them understand their need for freedom and how to seek this freedom in their own contexts Patrick Oden provides a holistic biblical historical and theological analysis that diagnoses the underlying motivations and inclinations that lead to oppression Part one addresses the context of oppression in which most participants in oppression do not actively seek to harm others but are caught up in systems that tend toward the diminishment of others Part two examines the biblical and early Christian response to oppression discovering a thread that avoids condemning participation in society generally while also cautioning the people of God about being co-opted by society Part three discusses how oppressors can withdraw from oppression through a constructive analysis of four contemporary theologians Wolfhart Pannenberg Jürgen Moltmann Sarah Coakley and Jean Vanier each of whom contributes to a widening vision of liberated and liberating life in which the once oppressed and former oppressor can find peace together in community

*Mencius on Becoming Human* Jim Behuniak, 2004-11-11 Using current research from traditional sources and newly unearthed documents dating from the Warring States period 403-221 B C E *Mencius on Becoming Human* offers a timely interpretation of a central text in the Confucian canon The author carefully reconstructs the philosophical assumptions that underwrite the teachings of the Mencius returning the text to its native intellectual world The result is a compelling new reading of an ancient classic one that is both sensitive to the details of historical context and contemporary in its philosophical implications James Behuniak Jr argues that the notion of an essential ahistorical human nature is not part of the

process of becoming human outlined in the Mencius Rather becoming human is described as a process of developing a qualitatively human disposition within specific cultural and historical conditions as these are understood within a Warring States cosmology The central themes of the Mencius the importance of family moral development and human advancement are each discussed within this reconstructed framework

**Becoming Human** Michael Tomasello, 2019-01-07 Virtually all theories of how humans have become a distinctive species focus on evolution Here Michael Tomasello proposes a complementary theory focused on ontogenetic processes Built on the essential ideas of Vygotsky his data driven model explains how those things that make us most human are constructed during the first six years of life

*Becoming Human* Jean Vanier, 1998 Our society shuns weakness and glorifies strength By embracing weakness however we learn new ways of living and discover greater compassion trust and understanding This spirit of inclusion has extraordinary implications for the way we live our lives and build our communities

BOOK JACKET [Becoming Human](#) Ian Tattersall, 1999 Explores the evolution of humankind who we are where we came from and where we are going

[Goethes Faust](#) Johann Wolfgang von Goethe, 1897

[Becoming Human](#) J. Canfield, 2007-09-28 This book is a philosophical examination of the stages in our journey from hominid to human Dealing with the nature and origin of language self consciousness and the religious ideal of a return to Eden it has a philosophical anthropology approach It provides an account of our place in nature consistent with both empiricism and mysticism

**Becoming Human** Scientific American Editors, 2013-09-23 *Becoming Human Our Past Present and Future* by the Editors of Scientific American We humans are a strange bunch We have self awareness and yet often act on impulses that remain hidden We were forged in adversity but live in a world of plenty How did we get here What is to become of us To these age old questions science has in recent years brought powerful tools and reams of data and in this eBook *Becoming Human Our Past Present and Future* we look at what these data have to tell us about who we are We know for instance that three million years ago a group of primates known as the australopithecines was walking capably on two legs the better to navigate the African savanna and yet still had long arms suited to life in the trees

In Section One *Becoming Us* we search for how and why this and other transitions occurred In *Lucy's Baby* author Kate Wong discusses what the oldest juvenile skeleton tells us about how early humans walked the Earth Another article *The Naked Truth* examines why humans lost their hair and how hairlessness was a key factor in developing other human traits

Section Two covers *The Secrets of our Success* and we see that human evolution and culture are often related In *The Evolution of Grandparents* Rachel Caspari shows us that as humans started to live longer grandparents played a role in family life which in turn made possible more complex social behaviors

In Section Three *Migration and Colonization* we look at how scientists are studying the minuscule bits of DNA that differ from one individual to another for clues to our origins and settlements *The First Americans* illustrates the findings that have pushed back the date at which hunter gatherers colonized the Americas

And in Section Four *Vanished Humans* the discovery of hobbits a human species of small stature has turned the science of

human origins on its ear Where is evolution taking us We present two points of view in Section Five Our Continuing Evolution In How We Are Evolving Jonathan K Pritchard argues that selection pressure typically acts over tens of thousands of years which means we probably won't evolve much anytime soon But stasis is only one possible future says Peter Ward in What May Become of Us In adapting to new environments say a colony on Mars our human species may eventually diverge into two or more Or we could go the cyborg route and merge with machines Whichever option you prefer there is plenty to ponder
